## Why are you interested in serving on a board or commission?

---

ing grown up in Edgewater in Anne Arundel County, I have always felt an obligation to serve those who helped raise me, as well as to contribute to a sustainable future in these environmentally and culturally rich communities. Now that I've lived in the City of Annapolis for three (3) years, that same urge to serve this place that I now call "home" has a new direction and lens. When it comes to how I serve, I have always been drawn to opportunities that involve engaging my neighbors in environmental stewardship. Working directly with residents as a representative of the County for five (5) years, I have practiced skills in assessing environmental concerns and offering empathetic guidance for projects on private, public, and community-owned land. My experience as a Grants Manager for three (3) years has also yielded a keen awareness of the true costs of offsetting the impact of humans on our environment, and how those costs can create barriers for many individuals and communities in the City and County. Having grown up, volunteered, and worked in this area for most of my life, one of my greatest strengths coming into this Board is a thorough understanding of the local organizations, programs, and resources available to property owners who want to do right by the environment. I also bring a strong understanding of land use management and local best practices, with a particular focus on nature-based stormwater management. The imperative duties of the Annapolis Conservancy Board to solicit dedication, administer management, and encourage preservation of environmentally sensitive areas within the City of Annapolis are critical to the sustainability of our City's future, and I do not take this obligation lightly. Through my experiences as Grants Manager and Outreach Coordinator for the County's Bureau of Watershed Protection & Restoration, I've experienced firsthand how challenging the efforts of land preservation, conservation, and management can be, both for local governments and private property owners. Though I come to the table with a lens of environmental preservation and sustainability, I also bring awareness and sensitivity to the socioeconomic barriers faced by many property owners who are just trying to do the right thing. We are incredibly fortunate in Maryland to have a strong network of public, private, and nonprofit partners whose mission involves breaking down these barriers, securing financial and technical support, and distributing helpful resources surrounding human-environmental coexistence. I'm excited about this opportunity to further my understanding of the City's environmental resources and how I can grow my impact potential alongside the Conservancy Board.
