Electrical Engineering Consulting & Project Management

Detail orientated **Senior Electrical Engineer** who undertakes challenging assignments, meets project deadlines and delivers excellent performance to both internal and external clients. Operates with a strong sense of urgency and thrives in a fast paced environment. **Core competencies include:**

Low/medium voltage electrical power distribution design (water, wastewater, commercial, and industrial facilities) · Multidiscipline project design coordination · Client engagement · Proposal development · Project scope and budget development · Specification development · Design build projects · Construction management (i.e.; shop drawing reviews, site inspections and budget analysis) · Utility service and telecommunications coordination · Standby power generation design · Fire alarm design · PLC/process control system architecture, controls and P&IDs · Instrumentation design · Code applications (i.e.; NEC, NFPA, IEEE, SCAT, 10 States) · Security system design · Lighting design · Lightning design · Grounding systems design · Solar panel design.

PROFESSIONAL EXPERIENCE

Power Design Incorporated · Washington, D.C Area · 2015 – Present

Partnered with top developers and general contractors Power Design Inc. provides full service electrical contracting for design-build projects, construction, engineering and lighting system designs.

Project Manager

Managing all business aspects of multiple concurrent projects and ensuring financial targets are met while maintaining established quality standards. Supervising and mentoring project team members. Actively maintaining customer relationships to ensure customer satisfaction and quality of service. Managing all activities associated with materials, budgeting, and production for assigned project(s). Planning and scheduling resources to meet project milestones. Acting as liaison with the customer and project staff to properly identify and process scope changes, address issues, communicate regarding project milestones, etc. Managing project related correspondence and documents through designated document management systems. Ensuring adherence to Power Design's standards of quality, safety, and best practices.

CDM Smith · Fairfax, VA · 2012 – 2015

Consulting, engineering, construction, and operations firm delivering integrated solutions in water, environment, transportation, energy and facilities to public and private clients worldwide.

Lead Electrical Engineer

Prepares electrical designs, power distribution and control wiring contract documents for water, wastewater, commercial, and industrial facilities. Extensive technical aptitude, knowledge of business/industry sector goals. Consistently delivers coordinated designs on time and under budget. Regularly functions fluidly between all disciplines. Manages individuals to foster and inspire teamwork and relationships for excellent client service. Supports marketing and area client service leaders for business development, executive reports, proposals and client presentations.

Client relationships include:
