

FISCAL IMPACT NOTE

Ordinance: O-25-22

Title: Prevailing Wage and Local Hiring

Date: September 15, 2022

This Ordinance establishes prevailing wage payment requirements and local hiring provisions for certain capital improvement projects. The amended version of the ordinance has reduced the amount of effort required for the program; however, the Department of Public Works (DPW) and/or Finance would still be responsible for monitoring the program. Since there are no available resources for this effort, the City would likely contract with an outside firm to monitor and enforce the requirements. DPW estimates the contractor would charge approximately \$100 per hour. We cannot determine the fiscal impact without an estimate of the number, size, and complexity of the capital projects that would require tracking.
