PURPOSE

Capital infrastructure is the cornerstone to providing core City services, and procuring, constructing, and maintaining capital assets are critical municipal activities. Capital assets comprise facilities, infrastructure, equipment, and networks that enable or improve the delivery of public sector services. Examples of capital assets include streets and public rights-of-way; supporting road infrastructure, such as sidewalks and lighting; stormwater and drainage systems; water and sewer systems; public buildings; recreation facilities and parks; public safety facilities; certain types of rolling stock and vehicles; computer technology, and information technology systems and infrastructure.

The City meets its current and long-term needs with a sound long-term capital plan that identifies capital and major equipment needs, maintenance requirements, funding options, and operating budget impacts. Recognizing that budgetary pressures make capital program investments difficult, it is imperative that the City's capital budget and capital improvement program ensure the continuing investment necessary to avoid functional obsolescence and preclude the negative impact of deferring capital investments.

The City considers all forms of public financing for its capital budget and capital improvement program, including pay-as-you-go funding, general obligation bonds, revenue bonds, capital leases, grants, and public-private partnership investments.

Other capital planning objectives include:

- Ensuring a relationship between the City's planning processes and its capital plan;
- Compliance with arbitrage regulations and bond covenants;
- Compliance with federal, state, and local laws, including debt capacity limits, procurement, and financial reporting requirements;
- The alignment of external and internal stakeholder information needs, such as project engineers, contractors, finance staff, executive management, elected officials, and constituents; and
- Meeting the business needs of key participants, including timing, cost activity, and project scope.

The quality and continued use of existing and new capital assets are essential to the health, safety, economic development, and quality of life for the citizens of Annapolis. A vibrant local economy is integral to the community's vitality and the financial health of surrounding regional jurisdictions. Regional economic development may require the financial participation of the City. For these reasons, capital planning is an important component of fiscal planning and vital to the local economy.

CITY CODE REQUIREMENTS

Pursuant to Section 6.16.030 of the City Code, the Mayor is required to submit a capital budget and capital improvement program (CIP) to the City Council and the Planning Commission at the first City Council meeting in April of each year. The capital budget appropriates funds for the ensuing fiscal year, and the CIP programs funds for the five years subsequent to the ensuing fiscal year. No obligations of the City may be authorized for any capital project not included in the capital budget. The Finance Committee is required to review the capital budget and CIP and make recommendations to the City Council by the second Monday in May of each year. Additionally, the capital budget and CIP are referred to the Financial Advisory Commission to provide its recommendations to the City Council.

The Planning Commission is required to review the proposed capital budget and submit its recommendations to the City Council no later than the second Monday in May. Pursuant to the Land Use Article of the Code of Maryland, Section 3-205, the purpose of the Planning Commission's review is to ensure the proposed projects are consistent with the City's comprehensive plan. Prior to making its recommendation to the City Council,

the Planning Commission is required to hold a public meeting on the proposed capital budget and CIP during which the Commission may accept evidence and testimony as it determines relevant.

The City Council is required to adopt the capital budget and CIP no later than June 30 of each year.

FUNDS OVERVIEW

The capital projects presented in the capital budget and CIP are grouped by the funds that support them – the General Fund and the Sewer, Water, Off Street Parking, Watershed Restoration, and Refuse enterprise funds. There currently are no capital projects budgeted or programmed for the Transportation enterprise fund.

General Fund

Capital projects supported by the General Fund generally fall into the following categories:

- City buildings and facilities;
- Information technology systems and infrastructure;
- Roadways, sidewalks, and infrastructure assets located in the public right-of-way;
- Recreation facilities and parks; and
- Special projects addressing economic development, revitalization, and redevelopment.

Sewer Fund

The Sewer Fund is an enterprise fund whose primary sources of revenue are user charges levied on sewer system customers and capital facilities assessments. The Sewer Fund supports capital projects related to wastewater collection and treatment.

The fund also supports a Water Reclamation Facility and a Wastewater Collection division. The Water Reclamation Facility is owned jointly with Anne Arundel County, Maryland. The Wastewater Collection division is responsible for operating, maintaining, and repairing the City's 123-mile sewage conveyance system, including 25 pumping stations.

Planning documents pertaining to sewer infrastructure include:

- Water & Sewer System Evaluation - Comprehensive Analysis Plan (2019)
- Water & Sewer System Evaluation - Final 10-Year Plan (2019)
- Anne Arundel County Master Plan for Water Supply & Sewerage Systems (2017)

Water Fund

The Water Fund is an enterprise fund whose primary sources of revenue are user charges levied on water customers and capital facilities assessments. The Water Fund supports capital projects related to the water distribution system and water treatment plant.

The fund also supports the Water Plant and the Water Distribution operating divisions. The Water Plant division is responsible for the production, treatment, testing, storage, and initial distribution of all potable water for customers of the City. The Water Distribution division is responsible for meter reading and operating, maintaining, and repairing the City's 137-mile water distribution system, including service lines, water meters, and fire hydrants.

Planning documents pertaining to water infrastructure include:

- Annual Water Quality Report
- Water Supply Capacity Management Plan (2017)
- Anne Arundel County Master Plan for Water Supply & Sewerage Systems (2017)
- Water & Sewer System Evaluation- Comprehensive Analysis Plan (2019)
- Water & Sewer System Evaluation- Final 10-Year Plan (2019)

Off Street Parking Fund

The Off Street Parking Fund is an enterprise fund whose primary source of revenue is parking fees generated by the use of the City's parking garages and off street parking lots. The fund supports operations and capital projects related to those parking facilities.

Watershed Restoration Fund

The Watershed Restoration Fund is an enterprise fund whose primary source of revenue is a fee imposed on all property owners in the City. The fund supports the operations and capital projects related to public stormwater management systems, watershed implementation plans, stream and wetland restoration activities, and compliance with the City's National Pollutant Discharge Elimination System Municipal Separate Storm Sewer (NPDES/MS4) and total maximum daily load (TMDL) requirements and goals.

Refuse Fund

The Refuse Fund is an enterprise fund whose primary source of revenue is a residential collection fee for curbside refuse, recycling, and yard waste collection. The fund supports operations and capital projects related to the collection of refuse, recycling, and yard waste.

CAPITAL BUDGET AND CIP DEVELOPMENT PROCESS

The process used by the Mayor to develop the proposed capital budget and capital improvement program is described below. For the purposes of this document, "capital asset" means an asset that has a gross purchase price of \$50,000 or more with a useful life of five or more years.

Capital Project Requests

The City Manager, Director of Public Works, or Director of Finance shall seek input from the City Council on their capital project priorities and requests. This may be done formally in a work session or City Council meeting or informally. Departments submit capital budget requests to the City Manager and Finance Director.

Capital budget requests submitted by members of the City Council and departments include the project description, scope, timing, operating budget impact, and any legal or regulatory requirement for the proposed project.

Mayor's Proposed Capital Budget and Capital Improvement Program

The Mayor makes the final decisions on the proposed capital budget and capital improvement program and submits it to the City Council, the Planning Commission, and the Financial Advisory Commission pursuant to Section 6.16.030. The capital budget and capital improvement program categorizes projects as follows:

- Buildings and facilities
- Information technology systems and infrastructure
- Roads, sidewalks, and assets located in the public right-of-way
- Parks, recreation facilities, and open space
- Stormwater and watershed restoration projects
- Harbor and maritime infrastructure
- Parking facilities
- Refuse projects
- Water projects
- Sewer projects
- Transportation projects
- Rolling Stock and vehicles

The Role of the Comprehensive Plan, Strategic Plan, and Master Plans that Affect Capital Projects Planning

The City recognizes the Comprehensive Plan, Strategic Plan, and master plans are key components of the City's long-term capital planning. These plans forecast the outlook for the City and underscore the alignment between demand generators, capital improvement programs, and funding policies. Accordingly, such plans should be supported by realistic planning documents, solid financial policies targeted for the implementation of stated goals, and trends on the City's accomplishments and progress toward these goals.

In its Comprehensive Plan, the City establishes long-range strategies focused on community development and sustainability. As a blueprint for the future, and in accordance with Article 66B of the Annotated Code of Maryland, this plan identifies economic, land use, and transportation policies, and includes policies guiding infrastructure, housing, sensitive environmental resources, and community facilities. Regular updates to this plan determine development and infrastructure needs as local conditions change.

The City's Comprehensive Plan is the foundation for:

- The development of physical plans for sub-areas of the jurisdiction.
- The study of subdivision regulations, zoning standards, and maps.
- The location and design of thoroughfares and other major transportation facilities.
- The identification of areas in need of utility development or extensions.
- The acquisition and development of community facility sites.
- The acquisition and protection of open space.
- The identification of economic development areas.
- The incorporation of environmental conservation and green technologies.
- The evaluation of short-range plans (zoning requests, subdivision review, site plan analysis) and day-to-day decisions regarding long-range jurisdictional benefit and the alignment of local jurisdictional plans with regional plans.
- The development of a capital budget and capital improvement program.

The Comprehensive Plan also adopts strategic goals that are referenced in the evaluation of capital projects and incorporated into this policy. When the Comprehensive Plan is updated, the update will formulate new strategic goals. The Strategic Goals per the 2009 Comprehensive Plan are as follows:

- Economic Development: Improve the city's property tax base by investing in projects that will spur new private investment to redevelop vacant and/or underutilized properties.
- Buildings and Facilities: Shrink the City's carbon footprint and become a community of green buildings to combat climate change.
- Roads: Specific and targeted improvements to the local street system should be made with priority to those that improve crosstown circulation, route continuity for public transit, and intersection capacities.
- Roads: Street improvements should be made to support the implementation of the Opportunity Areas.
- Roads: The City will invest in systemwide improvements to convert main streets and avenues into "complete streets" - that is, streets that serve the full needs of the community.
- Recreation/Parks: Enhance existing parks and facilities with the objective of supporting structured and informal recreation, protecting the natural environment, and encouraging human health and fitness.
- Recreation and Parks: Expansion of the parks system should be undertaken selectively and strategically, with the objective of taking advantage of rare opportunities, providing parks and recreation services to underserved areas, allowing public access to the waterfront, and furthering environmental goals.
- Trails: Complete the network of pedestrian and bicycle pathways.
- Transportation: Pursue the creation of a regional transit system serving the needs of Annapolis commuters, residents, and visitors.
- Buildings and Facilities and Roads: Protect and enhance Annapolis' rich cultural history and wealth of historic resources.
- Stormwater: Reduce the polluting effects of stormwater runoff into the Chesapeake Bay and its tributaries.
- Water: Protect and conserve the existing water supply and distribution systems by modernizing the existing treatment, storage and distribution system.
- Sewer: Enhance the wastewater collection and treatment systems by modernizing the existing collection system

The City Strategic Plan, completed in 2012, identified three primary issues. The issues and associated goals to be considered when assessing capital projects are:

- Issue 1: The need to match service delivery to resource constraints.
 - Goal 1: Optimize operating capital.
 - Goal 2: Give funding priority to core services.
 - Goal 3: Increase efficiency of operations, processes, and services.
- Issue 2: The need to diversify input to the City Council.
 - Goal 1: Improve City Council meetings to facilitate and encourage resident input from different perspectives.
 - Goal 2: Offer additional forums for residents to provide input to Council.
 - Goal 3: Improve and expand Council communication and interaction with residents.
- Issue 3: The need to promote housing and employment opportunities for lower and middle-income levels.

Master Plans may be developed to inventory and assess types of physical infrastructure, identify deficiencies, and prioritize needed investments. Functional areas include:

- City facilities
- Parks, recreation, and open space
- Transportation, including bicycle and pedestrian facilities
- Water and sewer Infrastructure
- Information technology systems and technology infrastructure

ACKNOWLEDGMENTS

This document could not have been prepared without the cooperation, support, and leadership of the Mayor, the City Council, the Finance Committee, and the Department Directors. The purpose of preparing a capital budget is to put forth the capital plan of the City and to show citizens the costs of capital improvements. Department Directors and City management staff spent many hours developing capital projects that would benefit the City of Annapolis. The individuals listed below played an integral part in the preparation of this document.

David Jarrell, P.E., City Manager
Jodee Dickinson, CPA, Finance Director
Michael Johnson, P.E., Director of Public Works
Michael Mallinoff, J.D., Acting Director of Planning and Zoning
Marcia Patrick, P.E., Assistant Director of Public Works
Katie Connolly, Senior Accountant
Adenike Olajire, Senior Accountant
Julie Donnelly, Assistant Finance Director

FY2023 - FY2028 CAPITAL BUDGET AND IMPROVEMENT PROGRAM PROJECT SUMMARY

Proposed
FY2023 – FY2028

Capital Budget and Capital Improvement Program

**City of Annapolis,
Maryland**

Project Title Annapolis Gateway Park			Project Number NEW		
Project Description: This project consists of a feasibility study for a proposed waterfront park and community boathouse to be located on College Creek near the Maryland State Archives facility. The project is currently referred to as "Paddle Park" and would be sited on two undeveloped parcels of land currently owned by the State of Maryland and NSA-Annapolis, respectively. The feasibility study will place specific emphasis on addressing access challenges and opportunities, adjacent trail connections and amenities, and the ideal footprint for a future facility that minimizes impacts to the surrounding site. The allocated funding will be used for both consultant services as well as a real estate assessment fee required by the Navy to support the lease of its property for the proposed use.

Project Title Annapolis Walk Park Improvements		Project Number NEW	
Project Description: This project will provide planning, design, construction, repair, and site improvements to the Annapolis Walk Community Park. The concept plan includes an updated volleyball court, picnic tables, benches, soccer field, entertainment chessboard stage, and resurfaced multisport courts. The variety of proposed recreational activities will provide recreation opportunities for many members of the community.		 <p>ANNAPOLIS WALK PARK CONCEPT PLAN</p>

Project Title Elktonia/Carr's Beach Park		Project Number NEW	
Project Description: <p>The acquisition of this 5.17 acre undeveloped property will allow for the preservation of an historic beachfront area in the City of Annapolis. The land was the site of many family gatherings, concerts by world-renowned artists, and other cultural events for the African American community in Annapolis. Carr's Beach and its neighboring Sparrow's Beach were two of the major Chesapeake Bay resorts that catered exclusively to African Americans between the 1930s and the 1960s. This was a time when most other resort and beach access was prohibited from this population. It has rich history for African Americans. Program Open Space funds will be used for the acquisition of the property for conservation purposes.</p> <p>The property will be accessible by land and water, and will become a City park. The history of the property ensures that it will attract a diverse audience of visitors. This new audience, attracted by the many stories of Carr's Beach events, will also be exposed to interesting facts about African Americans and their relationship to the Chesapeake Bay.</p>

Project Title City Dock Bulkhead		Project Number 74050	
Project Description: This project was for Phase II of the bulkhead replacement at City Dock which included improvements to infrastructure in the City Dock area including public space and access, construction of new bulkhead and seawall, replacement of boardwalk, upgrades to the water and electrical systems for boaters, and installation of a fire protection system. Required stormwater management (SWM) was unable to be completed within the footprint of the project and was approved for an off-site location. SWM for the City Dock Bulkhead project will be addressed in conjunction with the tennis court renovations at Truxtun Park.

Project Title City Dock Resilience and Revitalization		Project Number NEW													
Project Description: This is a multi-faceted project that will revitalize the City Dock area while enhancing resilience by eliminating tidal flooding and protecting against flooding caused by tropical storms and hurricanes. City Dock amenities will include: 1. Reduction of the heat island effect by adding tree canopy shading and public splash fountain, 2. Enlarged areas for public activities and programming at Dock Street, City Dock Park, and Susan B. Campbell Park, 3. Relocation of 120 parking spaces to new Hillman Garage. Resiliency measures include: 1. City Dock currently floods far too often, and frequency and severity to increase, leading to a requirement for a solution for the next 50 years (minimum), 2. Data suggests that elevating City Dock to 6 feet above sea level will protect against tidal flooding and minor storms, and 3. Elevation of 8 feet above sea level will protect against major storms and can be achieved through park elevation and flip up mechanical device design. The current tidal flooding will be eliminated through pumping high tidal water to avoid backflow through the storm drains by making the following changes: 1. The Harbormaster building will be demolished to make room for a building to house stormwater pump and control equipment and 2. The proposed pump station facility will double as an overlook assembly space and public restrooms.

Project Title City Facility Improvements	Project Number 20013/20014/20016/20017/40023																											
Project Description: This project will provide funding for capital improvements to various City-owned facilities, such as roof and window replacements, restroom renovations, elevator replacements, and renovations to ensure facilities are ADA compliant. Potential future projects include improvements at the Taylor Avenue FS (turnout gear storage improvements and range hood replacement), Eastport FS (bathroom renovations, parking lot repairs, and engine bay floors), Forest Drive FS (exterior building repairs and roof repairs), Knighton garage (replacement of manway and drain pipe), Gotts garage (canopy roofing repair) and Pip Moyer Rec Center (HVAC RTU replacement).

Project Title CRAB Boating Facility		Project Number 50027	
Project Description: This project appropriates \$500,000 of the City's Program Open Space (POS) Acquisition funds to acquire a marina at the end of Bembe Beach Road for the use of the Chesapeake Regional Accessible Boating (CRAB) organization. CRAB is a nonprofit organization formed in 1991 that provides sailing opportunities to those with disabilities. Anne Arundel County has committed up to \$1.3 million of its POS Acquisition funds for the purchase, and the State has awarded a \$1,000,000 capital grant to CRAB for improvements.

Project Title 100% Electric Annapolis Mobility Plan	Project Number NEW												
<p>Project Description:</p> <p>The Annapolis Mobility Plan (AMP) includes an all-electric transit system in downtown Annapolis and Eastport. Electric trolleys will transport riders from parking locations in the downtown area and Eastport to the Spa Creek waterfront. From there, an electric ferry will transport riders between City Dock and Eastport. This project includes the acquisition of an electric ferry boat, small electric cart vehicles, electric circulator buses, and all required charging and docking infrastructure. The first phase of the project, funded in FY2022, included the acquisition of an electric ferry boat and a comprehensive planning study, to include passenger demand analysis, parking and traffic study, infrastructure evaluation including dockage and electrical charging requirements, and operations and maintenance evaluation for the system. The proposed FY2023 phase includes electric vehicle acquisition. The FY2024 phase will include detailed design and construction of infrastructure improvements required for the electric ferry, circulators and trolleys as identified by the comprehensive planning study.</p> <p>Project costs include \$330,000 for an electric boat and \$100,000 for planning and conceptual design of the docking facilities in FY2022; \$550,000 for an electric Circulator bus, \$50,000 for two electric 6-passenger vans, and \$400,000 for DC charging infrastructure in FY2023; and City overhead. The costs for design and construction of the docking upgrade will be determined during the comprehensive planning study, and are expected to be funded in FY2024. It is anticipated that most of the project costs will be grant funded.</p>

Project Title General Roadways		Project Number 40018/40021	
Project Description: This project is to resurface and reconstruct the City's streets, curbs, and gutters. The City continually analyzes each area to develop a list based on conditions. Resurfacing activities include pavement milling and patching, utility adjustments, curb and gutter replacement, pavement resurfacing, brick repairs and replacement, and replacement of pavement markings. The ADA requires wheelchair accessible ramps at intersections where sidewalks adjoin streets. Although most of the City intersections have handicapped ramps, funds are used as necessary to update the existing ramps to the current standard or for new ramps.

Project Title Hawkins Cove Restoration		Project Number 40033	
Project Description: This project will fund the removal and replacement of a failing bulkhead with a living shoreline designed to allow water access while tying into a regenerative stream conveyance system. Specifically this will include the maintenance of rain gardens installed in 2018 by the Spa Creek Conservancy, pier repair, extension, or replacement as warranted by the shoreline design, and replacement of invasive vegetation on the landward side of the cove with native plants. Further improvements desired by the community such as seating and improvements to the existing trail system will be pursued in subsequent years through additional grants. Dredging of the channel in the cove to allow access to the pier for water taxis and other small watercraft may be pursued in the future.

Project Title Hiker/Biker Path – Rte. 450 to the Navy Memorial Stadium		Project Number 50025	
Project Description: This project is a partnership between MDOT/SHA, Anne Arundel County. The project consists of an improved bike and pedestrian connection from the MD 450 bridge to MD 435 (Taylor Avenue) and King George Street across College Creek. The project is in the design phase and being led by MDOT/SHA and Anne Arundel County which has a cost sharing agreement in place to fund the project through completion. The City is actively involved in advancing the best design for City residents and visitors and the Navy is supporting the project through land transfer and easements for expanded right of way.

Project Title Main Street Rebricking		Project Number 40011	
Project Description: Deterioration of the Main Street base and sub-base has resulted in severe settlement of both the travel lane and the crosswalks. The existing roadway is showing signs of accelerated deterioration and removal of fine aggregate from the subbase during rain events. This project will remove and replace the brick surface and base courses to return the roadway to a smooth and uniform surface. It may include modification of the curb line and sidewalks. Changes in regulations will require some redesign of this project. The City Council has modified this project description to require that the City Administration take any proposed modification to the existing curb line or sidewalk to the Historic Preservation Commission for its review and to require the City Council's approval of the design before moving ahead with construction.

Project Title Maynard Burgess House		Project Number 20002													
Project Description: The Maynard Burgess House has undergone several phases of work. This final phase of construction will address the first floor interior finishes, walls, floors, ceilings, and trim and complete security, fire detection and suppression systems, as well as the installation of exhibits. The project will include archeological recordation, offsite storage of artifacts, and a more delicate means of construction to preserve the historical integrity of the building. The property is protected (interior, exterior, grounds) by a perpetual historic preservation easement held by the Maryland Historical Trust; therefore, all work must be consistent with the Secretary of the Interior's Standards for Rehabilitation. The exterior work and ground disturbance is also subject to review and approval of the Annapolis Historic Preservation Commission.

Project Title Russell Street		Project Number 40013													
Project Description: This project is to reconstruct Russell Street between Smithville Street and West Street (MD450) to improve pedestrian, vehicular, and bicycle access to the Bates Legacy and Community Center and the Spa Creek Trail. Improvements include a sidewalk on the west side of the street, a bike lane southbound on the street, and curb and gutter to define the street edge. This project implements a portion of the 2005 Bates Community Legacy Plan.

Project Title S. Southwood Sidewalk and Stormwater Management	Project Number 40029														
Project Description: This project is for the installation of sidewalks, curbs, gutters, and roadway construction in the South Southwood area, an area that includes almost three miles of roads with and approximate 40 foot right-of- way. A feasibility study of the existing infrastructure will determine potential areas for connecting missing sidewalk sections and upgrading the existing sidewalks to be ADA compliant. The project includes evaluating stormwater management to address drainage complaints and to treat runoff from the additional impervious area due to the new sidewalks. It also includes treatment of the existing impervious area and evaluating the storm drain system to determine whether additional infrastructure is needed. The City will have to acquire right-of-way for installation of sidewalks, curb, gutter and roadway as necessary. This project assumes that the necessary rights-of-way for the installation of sidewalks, curbs, gutters, and roadways will be donated to the City and not purchased.

Project Title Standard Specifications and Construction Details	Project Number 50022												
Project Description: The current Standard Specifications and Construction Details were issued in August 1988. The Standard Specifications and Construction Details ensure land developers and engineers design and construct infrastructure that meet Annapolis' requirements. The Standard Specifications and Details are applicable to developer and City of Annapolis capital projects and ensure consistency across all projects. The current Standard Specifications and Construction Details require a thorough update and need to be available electronically. Additionally, the specifications and details need to be updated every year.

Project Title Stanton Center Renovations		Project Number NEW		
Project Description: A facility condition assessment was completed and concluded that the Stanton Center needed significant exterior and interior repairs to address code compliance issues. Renovations include repair to HVAC, mechanical, plumbing, and electrical. Interior repair includes corridors, restrooms, ceilings, floors, lighting, doors and finishes. Exterior repair includes brick facade and roofing repairs. Also included is the purchase and installation of lockers for the homeless in the community during the winter season.

Project Title Taylor Avenue Traffic Improvements			Project Number 40035		
Project Description: This project is for the reconstruction and realignment of Taylor Avenue from Cedar Park Road to West Street. This work will include a traffic circle at the intersection of Poplar Trail, the Graduate Hotel Access Road, and Taylor Avenue. Partial funding contributions for this project will be provided by the developer of the proposed Annapolis Hotel. This work will also include milling and resurfacing the roadway, stormwater mitigation, stormwater infrastructure, new curb and gutter, updated hiker/biker paths, and sidewalks.

Project Title Trail Connections		Project Number 50010	
Project Description: This project consists of several components to create a more cohesive on-street and off-street trail system in the City as recommended in the Annapolis Bicycle Master Plan (2011). This project improves the safety of bike travel and supports City policy to encourage alternative transportation options. The project may include planning, land acquisition, design, and construction. Project work will also include determination and initiation of possible land easements.

Project Title Truxtun Park Swimming Pool		Project Number 50008	
Project Description: Construction of the pool began in September 2019 and was completed in the summer of 2020. The new pool facilities include a new bathhouse, a competitive 25-yard, a six-lane lap pool, a family leisure pool, a splash pad, a snack bar, multiple ample-shaded patio areas, security enhancements, new furniture, and a new parking lot. The new pool and bathhouse comply with the Americans with Disabilities Act guidelines and the City's 2019 Stormwater Policy. The project also incorporated erosion and sediment control measures as part of the construction process.

Project Title Upgrade City Coordinate System		Project Number 50017	
Project Description: This project will upgrade the City's Proprietary Grid system from the 1920's to the NAD 83 system. The proprietary system will not be abandoned because it will be necessary for use with certain recorded documents, however, the two systems will be integrated. By upgrading to NAS 83, integration between many of the GIS applications is expected to become more seamless and accurate.

Project Title Weems-Whelan Field		Project Number 40032													
Project Description: The site of Weems Whelan playing field was previously a disposal site for incinerator ash. Preliminary studies have been performed to test for contaminants in deeper ash and the surface soil placed on top of that ash. The Maryland Department of the Environment (MDE) is reviewing the data and coordinating efforts for cleanup with the City. Assuming the site remains a playing field, appropriations will be used to perform required monitoring and to design, permit, and place additional soil cover if recommended or required by MDE.

Project Title West East Express Bikeway		Project Number NEW													
Project Description: This project will complete the long envisioned West East Express (WEE) bikeway which will connect Downtown Annapolis to Parole along the former WB&A railroad corridor. The project has been recommended in numerous plans including the Annapolis Bicycle Master Plan (2011). This project consists of three distinct segments: Inner WEE which connects Calvert Street to Taylor Avenue; improvements to the existing Poplar Trail (Taylor Avenue to Admiral Drive); and the Outer WEE which connects Admiral Drive to MD 2 / Solomons Island Road along various public and private right-of-ways. The overall project will become the spine of the City's trail system and connect numerous diverse communities to important services, conveniences, destinations, jobs, and recreation. The project will also dramatically improve the safety of bike travel and support City policy to encourage alternative transportation options. The project includes planning, land acquisition, design, easements, and construction. FY2022 funds will be used for project design on each segment. Construction work will be done in phases by location and likely commence in FY2024.

Funding: MDOT Bikeways grant was awarded in FY2021 for \$224,000 with \$56,000 match provided by City, a total of \$280,000. Of this amount, \$115,000 is dedicated to the Inner WEE segment. The remainder is dedicated to other Trail Connections which is a separate CIP project. A MDOT Bikeways grant was awarded in FY2022 for another total of \$280,000 (\$224,000 from MDOT and \$56,000 match from City). The funds from the FY2022 award are to be split between the improvements to the existing Poplar Trail and the Outer WEE. Another \$470,000 has been awarded in FY2022 by the MD Department of General Services for design and construction across all of the three segments. Scope: No change. Timing: Project design phase is on schedule.

Off Street Parking Fund

Proposed

FY2023 – FY2028

Capital Budget and Capital Improvement Program

**City of Annapolis,
Maryland**

Project Title Gott's Garage Elevator Replacement		Project Number NEW	
Project Description: The City owns and operates a parking garage located at 25 Calvert Street. The garage, built in the early 1990s, has operated with its original two elevators for close to thirty years. The two elevators have reached a stage where repair and maintenance expenses are no longer a cost-effective or viable option. This project will consist of dismantling both elevator cars and associated shaft equipment, updating or replacing electrical equipment in elevator machine room, and purchasing and installing new elevators.

Project Title Multi-Space Parking Meter Kiosks		Project Number 73006	
Project Description: This project will replace existing single-space parking meters with multi-space kiosks at multiple locations. The existing single-space parking meters, installed in 2014, are reaching the end of their useful life, requiring extensive maintenance or replacement and resulting in lost revenue. This project will replace 14 existing single-space parking meters on the right side of Main Street with two multi-space kiosks between Market Space and Gorman Street. It also replaces six single space meters on the left side of Main Street between Green Street and Gorman Street with one multi-space kiosk. The remaining kiosks will be used to replace single-spaced meters along Main Street. Other locations for the multi-space meters will be determined on an ongoing as the condition of the existing meters is evaluated.

Project Title: Parking Parking Access Control Management System		Project Number: 73004	
Project Description: This project will replace the existing entry and exit gates at the Gotts Garage, Knighton Garage and the Larkin Street surface lot. The current access system relies on outdated technology which is prone to failure and requires extensive maintenance. The replacement systems will be scalable and provide intelligent parking solutions customized to meet the needs of the end user. The improvements are part of a larger plan to upgrade services for better tracking of parking usage and behaviors, enabling more efficient use of resources.

Project Title Wayfinding Signage		Project Number 50011	
Project Description: This project will coordinate and install a system of signage and wayfinding technologies to be implemented citywide. The signage will include gateway signs, pedestrian signs, information kiosks, vehicular directional and welcome signs, real-time parking information, and other wayfinding tools. This project will be coordinated with new parking and transportation initiatives and with improvements to the City Dock area. The Comprehensive Plan recommends the expansion of the existing wayfinding program.

Capital Budget and Capital Improvement Program

**City of Annapolis,
Maryland**

Project Title Landfill Gas Mitigation		Project Number 10002/10003	
Project Description: Landfill gas (LFG) monitoring at the closed Annapolis Landfill has been ongoing for several years. Monitoring has confirmed that LFG migration has occurred along the northwestern property line and has been observed on the adjoining private property at explosive levels. No residential structures are at risk at the present time. In December 2017, the City and the Maryland Department of the Environment (MDE) finalized a settlement agreement that requires the City to collect and combust LFG that originates on the closed landfill property. The City is obligated to comply with specific time requirements or face legal sanctions. The design must provide for conversion of the existing passive LFG flare system to an active one and the installation of gas interceptor wells extending approximately 1200 lineal feet along the northwestern property line. It is estimated that the annual operational and maintenance costs will be approximately \$30,000.

**City of Annapolis,
Maryland**

Project Title Organics Resource Recovery Facility		Project Number 61000	
Project Description: The City currently pays Anne Arundel County approximately \$1.5 million annually for the disposal of its share of biosolids generated at the Annapolis Water Reclamation Facility, which the County transports to facilities out of state. Additionally, the City transports yard waste to Prince George's County for disposal. An engineering feasibility study performed in 2019 concluded that an organics composting facility constructed on the closed Gomoljack Landfill site would be financially viable. This project will allow the City to control costs for the processing and disposal of organic wastes in a responsible manner, generate marketable compost, and reduce harmful greenhouse gas emissions from transporting organics long distances. This project is a long-term, sustainable, zero-waste recycling initiative, and it is an appropriate use of City-owned land that has a minimal development potential.

Project Title Sewer Rehabilitation		Project Number 72006, 72007	
Project Description: Over half of the City's sewers are greater than 50 years old, with many greater than 80 years old, and require repair. The City's Water and Sewer Comprehensive Analysis Plan was developed using typical asset management practices, incorporating both probability and consequences of failure factors, establishing risk to every asset, and outlining the priority sewer system rehabilitation capital needs for the next five years. This project includes design and construction of sewer rehabilitation of identified priority assets. Most of the sewer pipes needing rehabilitation can be lined using trenchless methods, but others, including pump station assets, will need replacement. Sewer video inspection is required ahead of design. The plan also identifies additional planning work and assessment strategies necessary to refine prioritization of sewer asset rehabilitation into the future.

Project Title Water Tank Rehabilitation		Project Number 71002, 71006	
Project Description: This project provides for water tank painting, replacements, repairs and retrofits of valves, foundations, structures, and site improvements to the five elevated water tanks used for storage of the City's water supply. Tanks are painted in a cyclic order, and periodic replacements, repairs, and retrofits of the altitude valves, structures, and site improvements are made at the tanks. This project also includes additional assessments to refine prioritization of water tank projects into the future.

Project Title Water Treatment Plant	Project Number 71001													
Project Description: The Water Treatment Plant is at the end of its useful life and in need of replacement. It has significant operational and structural constraints. The existing facility has regulatory and safety issues. Hydraulic issues limit the production capacity of the plant to below its design capacity. A Facility Plan Report (2009) showed that operational and structural constraints result in less than efficient and economical production of drinking water. Replacement parts for most of the mechanical equipment are difficult to find, and some parts are no longer being made. At best, refurbishing the existing plant would be difficult, and operational and structural constraints would remain. The results of the life-cycle cost and qualitative analyses show that a new water treatment plant is the best alternative.

Project Title Water Treatment Plant Improvements			Project Number NEW		
Project Description: This project will include items that were outside of the contract for the recently completed Annapolis Water Treatment Plant. This includes the design and installation of a new dehumidification system and the design and installation of various wellhouse improvements. Some of the wellhouses (#2, #5, #6, #7, #10, #11, #12 and #14), which date from the 1940's to the 2000's, require structural, mechanical, and/or electrical improvements.

Proposed

FY2023 – FY2028

Capital Budget and Capital Improvement Program

**City of Annapolis,
Maryland**

Project Title Stormwater Management Retrofit Projects		Project Number 77002/77010/77011/77012/77015/77018	
Project Description: Storm drains, inlets, and other stormwater facilities are in need of repair due to age. Some corrugated metal pipes have fallen apart in the ground, and many concrete pipe joints have failed and need replacement. Some manholes and inlets need rebricking. This project also maintains 32 outfalls 15" or greater in diameter. This is an ongoing infrastructure project. Sections will be replaced, repaired, or retrofitted based on field inspections by utility crews on an annual basis.

Project Title Stormwater MS4 Permit Compliance		Project Number 77008/77009/77016/77017													
Project Description: The City of Annapolis is required by the U.S. Environmental Protection Agency (EPA) and the Maryland Department of the Environment (MDE) to meet the requirements of the National Pollution Discharge Elimination System/Municipal Separate Stormwater Sewer System (NPDES/MS4) permit. A Stormwater Pollution Prevention Plan, including associated mapping, will be established. A restoration plan will be developed to implement water quality improvement projects, including working with local partners, obtaining community input, and providing opportunities for public education. New and retrofit Best Management Practices (BMPs) will be developed, designed, and constructed to meet MS4 permit goals.

APPENDIX E
COMMUNITY GRANT LISTING

City of Annapolis Community Grant Funding FY 2023

The FY 2023 Community Grant Applications have been organized into the service categories outlined in the City Code §6.16.060(b), with subcategories added in some instances, to aid the reader in quickly identifying the purpose of the program.

CATEGORY 1 (numbering of categories is not an indication of ranking)

Organizations provide services that sustain and empower youth, families and individuals to move towards an improved quality of life and sustainability.

Organization	FY 2022 Adopted	FY 2023 Grant Request	FY 2023 Community Grants Committee Recommendation	FY 2023 Finance Committee Recommendation	FY 2023 Council Adopted
