Sign Regulations – Temporary Signs

Staff Report

This legislation amends the standards concerning temporary signs for community or civic projects or special events or events of public interest such as carnivals, community gatherings, fairs, political events and other events of a similar nature.

Currently, Section 21.70.060 of the City Code restricts the size of such signs to twenty square feet. This legislation proposes to increase the size standard upto thirty-two square feet, which is commensurate with other temporary sign standards, e.g., construction site signage.
