

Staff Report

Ordinance O-23-18

Rezoning the City Dock to the Mixed Use (MX) Zoning District

The proposed ordinance would implement recommendations of the City Dock Master Plan by establishing Mixed Use (MX) zoning in the City Dock area. Currently, the MX Zoning District consists of properties from Church Circle to Westgate Circle along West Street. The map below shows the existing MX Zoning, which includes an area in the historic district (the block closest to Church Circle).

Existing Mixed Use (MX) District

Development Standards

Building Height Measurement: It is proposed that height be measured from flood protection elevation or grade, whichever is greater throughout the City. This will help properties in the flood plain have a certain number of stories, regardless of additional elevation required to meet building Code.

Reference

21.64.460 - Parking garages.

A. Underground parking garages are a permitted use.

B. Garages up to three levels of above-grade parking are a permitted use subject to the following standards:

1. The visibility of all parking facilities from any street or residential zoning district shall be minimized whenever possible. Visible façades of parking facilities shall be designed to be compatible with the architectural character of surrounding structures.
2. Measures shall be taken to restore the vertical edge of the streetscape, as required by the Department of Planning and Zoning.
3. Parking garages in excess of three levels of above-grade parking may be permitted by special exception. The standards for garages up to three levels of above-grade parking must be met in addition to the standards for approving a special exception.

21.66.130 - Table of off-street parking requirements.

Use	Standard	Additional Provisions
Hotels	One space per three lodging rooms, plus additional parking for auxiliary/accessory uses.	For conference room facilities to be used by persons other than guests of the hotel: parking spaces equal to 30 percent of the maximum capacity in persons of the facilities.
