14.12.040 - Environmental Commission.

In addition to any other duties assigned by this code, the Environmental Commission shall perform the following functions:

- A. Recommend the appointment of a forester;
- B. Study the problems and determine the needs of the City in connection with its tree planting, protection and maintenance programs;
- C. Assist in the dissemination of news and information regarding the selection, planting and maintenance of trees within the areas subject to the jurisdiction of the City, whether the areas are private or public property, and make recommendations for legislation concerning the tree program and activities;
- D. Investigate and implement alternative funding sources for the planting and maintenance of trees and shrubs on public lands;
- E. Conduct meetings and forums at which the subject of trees is discussed.

14.12.050 – Responsibilities of the Director of Planning and Zoning.

- A. Implementation, administration and execution of the requirements of this chapter are the responsibility of the Department of Planning and Zoning or his or her designee.
- B. The Director of Planning and Zoning or his or her designee shall have the following general powers and duties:
 - 1. To direct, manage, supervise and control the street tree program, including all planting, removal, maintenance, and protection of all trees and shrubs on all public areas;
 - 2. To guard all trees and shrubs to prevent the spread of disease or pests and to eliminate dangerous conditions which may affect the life, health or safety of persons or property;
 - 3. To perform other related functions as are assigned.

14.12.060 – Damage to trees and shrubs.

No person shall break, injure, mutilate, kill or destroy any tree or shrub in any public area, or permit any animal under that person's control to do so; permit any leak to exist in any gas line within the root zone of any tree or shrub; permit any toxic chemical to seep, drain or be emptied on or about any tree or shrub; or permit electric or communication wires to come in contact with any tree or shrub. During building or construction operations, suitable protective barriers shall be erected around trees and shrubs in public areas which may be subject to injury or destruction.

14.12.070 – Fastening materials to trees and shrubs.

No person shall fasten any sign, rope, wire, or other materials to, around or through any trees or shrubs in any public area without obtaining prior written approval from the department, except in emergencies such as storms or accidents.

14.12.080 – Plant, remove, maintain and protect public trees without permit.

- A. A person neither shall plant trees or shrubs in any public area, nor undertake any maintenance or protection, or otherwise disturb any tree or shrub in any public area, without obtaining prior written approval from the department, except in emergencies such as storms or accidents. Arboricultural specifications and standards of workmanship as set forth in the written approval shall be adhered to in the performance of the work.
- B. Subject to the provisions of Chapter 16-12, approval of the department is not required to water trees or shrubs.
- C. Any person who violates this section is guilty of a municipal infraction and is subject to a fine as established by resolution of the City Council.

14.12.090 – Power to plant, remove, maintain and protect.

The department may plant, remove, maintain and protect trees and shrubs on or adjacent to all public areas as may be necessary to ensure safety or preserve the symmetry and beauty of the grounds. Appropriate advance written notification shall be made to adjacent property owners of the City's intent to plant or remove trees or shrubs.

14.12.095 – Tree conservation area Tree removal.

- A. "Tree conservation areas" are established to be the same areas as the legally defined front, side or rear yard setbacks of any residential or commercial property as described in the zoning regulations of the City of

- Annapolis, which are adjacent to a public right-of-way.
- B. Within a tree conservation area, no tree greater than five inches in diameter as measured at four and one-half feet above the ground shall be removed except as provided for in this section. Within a tree conservation area, the property owner may remove trees that are less than five inches in diameter as measured at four and one-half feet above the ground.
- C. A permit issued by the Director of Planning and Zoning or his or her designee is required for the removal of any tree greater than five inches in diameter, as measured at four and one-half feet above the ground, located within the tree conservation area. The tree removal permit application fee and permit fee shall be set by resolution of the City Council. Conditions under which such a permit may be issued include but shall not be limited to the following:
1. The tree is dead, dying or diseased, such that fifty percent or more of the crown area is visibly dead;
 2. The tree is damaged or injured to the extent that it is likely to die or become diseased;
 3. The removal of the tree will serve the purposes of this chapter or will enhance the health of the remaining trees in the conservation area;
 4. The removal of the tree will avoid or alleviate, mitigate, or reduce a substantial hardship or damage to the property or any structure located thereon; or
 5. The removal of the tree is consistent with good forestry practices.
- D. A permit shall not be required for public utilities to remove trees situated in proximity to overhead or underground facilities or in case of any emergency in which failure to remove a tree is likely to cause imminent damage to public or private property, as used herein, the term "public utilities" means any "public service company" as defined in the Public Utilities Article, Section 1-101, of the Annotated Code of Maryland, or its successor statutes; or in case of any emergency in which failure to remove a tree is likely to cause imminent damage to public or private property.
- E. In issuing a permit, the Director of Planning and Zoning or his or her designee may, in its discretion, require that replacement tree(s) be planted. The size, location and variety of any replacement tree may be required by the Director of Planning and Zoning or his or her designee, solely at his or her discretion, to reestablish the visual character and environmental benefits afforded by the trees which were removed. Replacement as follows shall be deemed conclusively to be a reasonable exercise of such discretion:

Removed tree	Replacement Tree(s)
5-10" Diameter breast height (dbh)	1 tree
10.1-20" Diameter breast height (dbh)	2 trees
Greater than 20"	3 trees

If the tree conservation area is insufficient in size to accommodate more than one replacement tree or if it is undesirable to plant appropriate replacement trees (as determined by the Department of Planning and Zoning, in its sole discretion), then the issuance of the permit shall be conditioned upon the approval by the Director of Planning and Zoning of a planting plan, developed by the owner, to plant replacement trees in another location approved by the Department of Planning and Zoning.

- F. The tree conservation area shall be the first priority for replacement of removed trees as required under the preceding subsection. Alternate planting sites, in order of preference, are:
1. An area on the property adjacent to any public right-of-way other than the tree conservation area;
 2. An area within any adjacent public right-of-way;
 3. Any other public property;
 4. Any property with a conservation designation (e.g.: property reserved as part of the subdivision process; property within the critical area; etc.);
 5. Any other appropriate area.

If no alternative planting site can be located, a fee equivalent to the in-ground cost of planting replacement trees shall be paid by the permit applicant to the City, which shall plant an equivalent number of trees in an

~~appropriate location within one year.~~

- G. A property owner shall replace any tree removed without a permit according to the replacement standard in Subsections (E) and (F) of this section. The site, location and variety of such replacement trees shall be reviewed and approved by the Director of Planning and Zoning or his or her designee in accordance with the standards set forth herein.
- H. Violation of this section shall be a municipal infraction punishable by a fine as established by resolution of the City Council for each tree greater than five inches in diameter at 4.5 feet above the ground removed from the tree conservation area without a permit. In addition, the Director of Planning and Zoning or his or her designee may revoke any permit issued under this section and/or issue an order stopping further tree removal whenever the director or designee determines that such action is necessary to accomplish the purpose of this section. Enforcement of this section shall be the responsibility of the Department of Planning and Zoning. All fines must be paid in full before any work can continue.
- I. Where this section and any other Federal, State or local law regarding tree removal and/or replacement apply to a given circumstance, the more restrictive law shall control.

14.12.100 – Master street tree plan.

- A. The department shall formulate a master street tree plan with the advice of the Environmental Commission. The master street tree plan shall specify the species of trees to be planted on each of the streets or other public sites of the City. After approval by the Historic District Commission of the portions of the plan affecting the historic district, and following the adoption of the plan by the City Council, all planting shall conform to the plan.
- B. In preparing the master street tree plan, the department shall evaluate all space and site factors which will aid in the determination of the tree species best suited to a particular planting site before recommending a specific species.
- C. The department shall recommend revisions of the master street tree plan when advisable.

14.12.110 – Rules and regulations.

The department shall recommend rules and regulations for the arboricultural specifications and standards of practice governing the planting, maintenance, removal, fertilization, pruning and bracing of trees in all public areas. All arboricultural practices shall follow the National Arborist Association standards and shall take effect upon adoption by the City Council.

14.12.120 – Species and varieties.

- A. The department shall prepare lists of trees acceptable for planting in the public areas. Undesirable trees shall not be recommended for general planting, and their use, if any, shall be restricted to special locations where, because of certain characteristics of adaptability or landscape effect, they can be used to advantage.
- B. Only desirable trees of good appearance, beauty, adaptability, and generally free from injurious insects or disease shall be planted in public areas.
- C. Where street blocks have been assigned a particular species or variety on the master street tree plan, only that species or variety shall be planted, subject to revisions by the Director of Public Works or his or her designee.

14.12.130 – Size.

- A. Unless otherwise specified by the department, all deciduous tree species and their cultivars and varieties shall conform to American Association of Nurserymen standards and be at least one and three-fourths inches in diameter six inches above ground level, and at least eight to ten feet in height when planted. The crown shall be in good balance with the trunk.
- B. Unless otherwise allowed for specific reasons, all trees shall have comparatively straight trunks, well-developed leaders and tops, and roots characteristic of the species, cultivar or variety showing evidence of proper nursery pruning. All trees must be free of insects, diseases, mechanical injuries, and other objectionable features at the time of planting.

14.12.140 – Location.

- A. Where a tree is requested by an owner of private property adjacent to public property, and the location is

determined to be desirable, and no appropriate public property is available, an easement or other legal agreement may be sought to plant on the private property that is in proximity to public property. The legal agreement may contain provisions granting the City permission to select and plant trees under the direction of the Director of Planning and Zoning. The legal agreement shall contain provisions defining the City's absence of liability in the event of personal injury or damage caused during, or as a result of, planting on private property. Appropriate advance written notification shall be made to the adjacent property owners of the City's intent to plant trees.

- B. Trees shall be planted at least thirty feet from the street intersections and at least fifteen feet from driveways and alleys.
- C. No tree shall be planted closer than ten feet to a utility pole or fire hydrant.
- D. Spacing of trees shall be determined by the department according to local conditions, the species, cultivars or varieties used, their mature height, spread and form. Generally, all trees shall be planted twenty-five to fifty feet on center. The exact planting location of each tree and shrub shall be determined by the Director of Planning and Zoning.
- E. All planting on unpaved streets without curbs shall have the approval of the department. The trees shall be located so that they will not be injured or destroyed when the street is curbed and paved.

14.12.150 – Pruning and removal of trees.

- A. No topping or dehorning of trees shall be permitted, except upon prior written approval of the department.
- B. All large, established trees shall be pruned to sufficient height to allow free passage for pedestrian and vehicular traffic, which shall be ten feet over a sidewalk and twelve feet over a street, except a street subject to truck traffic which, at the discretion of the department may have clearance of fifteen feet. The department may waive the provisions of this section for a newly planted tree upon a determination that the tree does not interfere with public travel, obstruct the light of any street light, or endanger public safety.
- C. All dead wood, stubs, broken branches, badly formed branches, disease-infected and insect-infested branches, and branches interfering with public travel, lighting, existing buildings and traffic signs shall be removed during the trimming operation, with consideration given to the symmetry and beauty of the tree or shrub.
- D. All trees and shrubs in public areas which are marked for removal shall be removed completely from the growing site and disposed of in an authorized manner. The stump shall be removed to a depth suitable for future planting of trees or turf.
- E. Any person who violates this section is guilty of a municipal infraction and is subject to a fine as established by resolution of the City Council.

14.12.160 – Right of entry.

The department, after giving reasonable advance notice to the owner or tenant having charge, may enter upon private premises at reasonable times for the purpose of examining or inspecting any suspected nuisance tree or shrub. All nuisance trees and shrubs to be removed or to be worked upon may be marked appropriately by the department.

14.12.170 – Cost of planting, removing, maintaining and protecting.

- A. The cost of planting trees on public rights-of-way shall be financed jointly by the adjacent property owner and the City. When a street tree is requested by an adjacent property owner, that adjacent property owner shall pay to the City the sum of thirty dollars per tree. The City shall assume the remaining costs for the purchase and planting of the tree.
- B. A special annual assessment on property owners not to exceed five cents per linear foot of street frontage may be imposed by the City Council. The funds generated by the imposition of the assessment shall be used only for the planting, maintenance and removal of trees and shrubs in public areas.

14.12.180 – Interference with department.

No person shall prevent, delay, or interfere with the department in the execution or enforcement of the provisions of this chapter.

14.12.190 – Nuisance Designated.

Any tree or shrub or part of a tree or shrub growing upon private or public property which is interfering with the use of any public area, infested with an infectious plant disease, infested with injurious insects, injurious to public improvements, or endangering the life, health or safety of persons or property is a public nuisance.

14.12.200—Nuisance-Abatement.

- A. If the department determines, upon inspection or examination, that any nuisance tree or shrub exists in or upon any public area, the department immediately shall cause the tree or shrub to be treated, trimmed, removed or otherwise abated to eliminate or prevent the spread of the nuisance. The manner in which the nuisance is abated shall be determined by the department.
- B. If the department determines, upon inspection or examination, that any nuisance tree or shrub exists in or upon any private property, the owner or tenant having charge of the premises shall be given written notice describing the nuisance tree or shrub and the necessary corrective action. Within thirty days after the issuance of the notice, the person shall undertake the corrective action specified in the notice unless, in the opinion of the department, an emergency exists, in which case the department immediately shall cause the tree or shrub to be treated, trimmed, removed or otherwise abated to prevent the spread of the nuisance. If the owner or tenant refuses or neglects to comply with the terms of the written notice within thirty days after receiving it, the department shall abate the nuisance and the expense of abatement shall be a charge and lien upon the real property on which the tree or shrub is located, to be collected in the same manner, and bear the same interest and priority as real property taxes.

14.12.210—Appeals.

A person aggrieved by an order from the department may appeal to the Building Board of Appeals within fifteen calendar days of receipt of the order, per Section 17.12.130. The petition for appeal shall be in writing and shall state the grounds for appeal. The scheduling of the hearing and the rendering of the decision shall be expedited if warranted by the circumstances. The board may affirm, rescind or modify the order, in its discretion, to conform the order to the intent of this chapter.

TITLE 17 - BUILDINGS AND CONSTRUCTION

Chapter 17.08—GRADING, EROSION AND SEDIMENT CONTROL

17.08.010—Purpose.

- A. The purpose of this chapter is to protect, maintain, and enhance the public health, safety, and general welfare by establishing minimum requirements and procedures to control the adverse impacts associated with land disturbances. The goal is to minimize soil erosion and prevent off-site sedimentation by using soil erosion and sediment control practices designed in accordance with the Code of Maryland Regulations (COMAR) 26.17.01, the 2011 Maryland Standards and Specifications (Standards and Specifications) and the Stormwater Management Act of 2007 (Act) or its successors. This chapter will help reduce the negative impacts of land development on water resources, maintain the chemical, physical, and biological integrity of streams, and minimize damage to public and private property.
- B. The provisions of this chapter are minimum requirements. They shall be conformed to in addition to, rather than in lieu of, all other legal requirements, and shall be construed liberally to accomplish the purposes set forth. No person shall allow and no landowner shall permit any work to be performed which violates this chapter.
- C. The provisions of this chapter are adopted pursuant to Annotated Code of Maryland, Environment Article, Title 4, Subtitle 1 (or its successors), as well as the authority of the City Charter and the City Code and shall apply to all grading occurring within the City.

~~17.08.020 – Liability for damages.~~

The issuance of a permit under the provisions of this chapter or compliance with the provisions of this chapter does not relieve a person from responsibility for damage to persons or property otherwise imposed by law, or impose liability on the City for damages.

~~17.08.030 – Grading permit Required application.~~

- ~~A. Except as set forth in Section 17.08.040, no person shall do and no owner allow, any grading of land without first having obtained a grading permit from the Director. Each permit shall authorize only the improvements set forth in the application and accompanying drawings, but each permit may cover any number of contiguous lots.~~
- ~~B. The application shall be filed with the Director or designee. Both the owner of the property and the contractor engaged to do the work are responsible equally for obtaining the required grading permit.~~

- A. ~~The Director, based on written recommendations from the Anne Arundel Soil Conservation District, may grant a variance from the requirements of the Standards and Specifications, if strict adherence to the specifications will result in exceptional hardship and not fulfill the intent of this chapter. The developer shall submit a written request for a variance to the Director and the Anne Arundel Soil Conservation District. The request shall state the specific variances sought and reasons for requesting the variance. The Director shall not grant a variance unless and until sufficient specific reasons justifying the variance are provided by the owner/developer to the satisfaction of the Anne Arundel Soil Conservation District and the~~

- B. The Anne Arundel Soil Conservation District and the Department shall review erosion and sediment control plans to determine compliance with this chapter and the standards and specifications prior to approval. In approving the plan, the Anne Arundel Soil Conservation District and the Department may impose such conditions that may be deemed necessary to ensure compliance with the provisions of this chapter, COMAR 26.17.01, the standards and specifications, and the preservation of public health and safety.
- C. The review and approval process shall be in accordance with the comprehensive and integrated plan approval process described in the Standards and Specifications, Chapter 17.10 of the City Code.
- D. At a minimum, a concept plan must include the mapping of natural resources and sensitive areas including highly erodible soils and slopes greater than fifteen percent, water resources, as well as information required under Chapter 17.10 of the City Code, or any other information required by the Department. These areas are to remain undisturbed or an explanation must be included with either the concept or site development plan describing enhanced protection strategies for these areas during construction.
- E. A site development plan submittal must include all concept plan information and indicate how proposed erosion and sediment control practices will be integrated with proposed stormwater management practices. The latter is to be done through a narrative and an overlay plan showing both ESD and erosion and sediment control practices. An initial sequence of construction and proposed project phasing to achieve the grading unit restriction shall be submitted at this time.
- F. An applicant shall submit a final erosion and sediment control plan to the Department for review and approval. The plan must include all of the information required by the concept and site development plans as well as any information in Section 17.08.060 of the City Code not already submitted, and any other information required by the Department.
- G. A final erosion and sediment control plan shall not be considered approved without the inclusion of the signature and date of the Anne Arundel Soil Conservation District on the plan.
- H. Approved plans remain valid for two years from the date of approval unless extended or renewed by the Anne Arundel Soil Conservation District and the Department.
- I. Grandfathering of approved sediment and erosion control plans:
 - 1. Any plans that receive final approval after January 9, 2013 must be in compliance with the requirements

~~of this ordinance and the standards and specifications.~~

- ~~2. A plan that receives final approval by January 9, 2013 may be reapproved under its existing conditions if grading activities have begun on the site by January 9, 2015, with the exception of stabilization requirements.~~
- ~~3. Stabilization practices on all sites must be in compliance with the requirements of this chapter and the standards and specifications by January 9, 2013 regardless of when an approved erosion and sediment control plan was approved.~~

17.08.070 – Permit Approvals.

~~No grading permit shall be issued unless:~~

- ~~A. The Department has reviewed and approved all site plans and specifications, and verified the estimated costs; and~~
- ~~B. An erosion and sediment control plan has been approved by the Anne Arundel Soil Conservation District. The approved plan shall include the signature and date of approval by the approval agency; and~~
- ~~C. All plans have received written approval by the appropriate State and Federal agencies, where applicable; and~~
- ~~D. Special exception or subdivision approval, as appropriate, has been obtained for land development projects; and~~
- ~~E. For a use which is designated under Title 21 as a permitted use subject to standards, the project first has been approved by the Department of Planning and Zoning in accordance with Chapter 21.64 of the Code; and~~
- ~~F. All other provisions within the Code have been satisfied, as required. The Department may impose such conditions as may be determined to be necessary to ensure compliance with the provisions of this title, the State sediment control regulations, COMAR 26.17.01, the Standards and Specifications, or for the preservation of public health and safety.~~

17.08.080 – Grading permit Fees-Reinspection.

- ~~A. The fee for a grading permit shall be based upon the estimated cost of site work proposed, and includes the cost of materials and labor for installation and construction of such items as earthmoving, sediment control measures, storm drainage systems and stormwater management facilities, and roadways. Estimated costs and quantities shall be submitted to the Department. The fee shall be established by resolution of the City Council.~~
 - ~~1. The application fee will not be refundable for any reason except if the permit application has been denied. The application fee will be applied to the final cost of the grading permit at the time of issuance per the procedures as established by the Department of Public Works.~~
- ~~B. Reinspection Fee: A fee as established by resolution of the City Council must be paid before another inspection is made if, for the original inspection, one or more of the following occurred:~~
 - ~~1. Requesting party called for inspection, but work was not ready;~~
 - ~~2. Requesting party was not on site;~~
 - ~~3. Building was locked;~~
 - ~~4. Safety features not on site;~~

- ~~5. Approved drawings not on site;~~
- ~~6. Permit not posted on site.~~

~~17.08.090 – Bonding Purpose.~~

~~The purpose of the bond is to guarantee and insure, in the event of failure, that all work authorized by the permit will be completed satisfactorily, and that the site will be restored to a condition meeting the minimum requirements of this chapter.~~

~~17.08.092 – Bonding Required.~~

~~A. A performance bond shall be a prerequisite to obtaining a grading permit when:~~

- ~~1. Greater than five thousand square feet is disturbed; or~~
- ~~2. More than one hundred cubic yards are graded; or~~
- ~~3. Any public facility or stormwater management facility is proposed.~~

~~B. The bond amount shall be based upon the total estimated cost of labor and materials for construction and installation of:~~

- ~~1. Earthmoving;~~
- ~~2. Erosion and sediment control measures;~~
- ~~3. Vegetative stabilization;~~
- ~~4. Stormwater management systems and facilities;~~
- ~~5. Public sanitary sewers and water mains;~~
- ~~6. Roadways and roadway improvements; and~~
- ~~7. Any other public improvements.~~

~~C. A maintenance bond shall be required upon satisfactory completion of all requirements set forth in the grading permit. The maintenance bond shall represent a minimum of ten percent of the performance bond and is in effect for a minimum of one year. The Director or his or her designee may make adjustments based on current estimates or site conditions.~~

~~D. Bonding estimates shall be certified by a registered engineer or land surveyor.~~

~~E. Before acceptance, all bonds shall be approved by the Director or his or her designee and the City Attorney.~~

~~F. In lieu of a bond, a cash deposit, certified check or an irrevocable letter of credit from a local bank or other accredited institution in like amount, may be filed with the Department subject to the same terms and conditions as applicable to a performance bond. All bonds and letters of credit shall be submitted in City format.~~

~~G. If a corporation bond is offered, it shall be executed by a surety or guaranty company qualified to transact business in the State, and if a cash bond is offered, it is to be deposited with the Director of Finance, who shall give an official receipt stipulating that the cash has been deposited in compliance with, and subject to, the provisions of this section.~~

~~H. If all work of the permit is not completed within the time specified in Section 17.08.140, or if any portion of the work violates any other terms or conditions, the cash deposit shall be forfeited, or if a bond or letter of credit has been posted, payment in full to the City will be ordered. The funds so received shall be used by the City for defraying the cost of contracting, including engineering and administration, for the restoration~~

of the site to meet the minimum requirements of this chapter, with particular emphasis on stabilization, safety, drainage and erosion control. If those costs exceed that amount of deposit or bond or letter of credit, the excess constitutes a lien on the property, and the permittee continues to be bound firmly under a continuing obligation for payment of any and all costs and expenses of any nature incurred by the City. Any unused portion of moneys forfeited shall be returned. No money shall be returned to any surety or guaranty company if such funds were acquired, obtained or paid pursuant to a court order or judgment.

17.08.100 – Permit Bond provisions.

The bond or letter of credit shall include the following provisions:

- A. The applicant shall comply with Section 17.09.092, this section and all other applicable laws and ordinances.

- C. Any extension of completion time pursuant to the provisions of Section 17.08.140 shall not release the applicant.
- D. Upon default, the applicant shall continue to be bound firmly under a continuing obligation for payment of one of the following, at the election of the surety:
 - 1. All costs and expenses necessary to complete the work in accordance with the approved plans and specifications or any approved modification to the approved plans or specifications; or
 - 2. All necessary costs and expenses or liabilities which may be incurred to stabilize in accordance with the stabilization plan for erosion control presented by the applicant to and approved by the City; or
 - 3. Payment to the City in cash or by certified check in a sufficient amount to equal the cost of performing the necessary work. If the cost for restoration of a site to meet the minimum requirements of this section (with particular emphasis on stability, safety, drainage and erosion control) exceeds the amount of the cash or certified check, the permittee shall continue to be bound under a continuing obligation for payment of all excess costs and expenses incurred by the City.
- E. The security shall remain in full force and effect until a certificate of completion has been issued by the Department of Planning and Zoning certifying that the work has been performed in accordance with the plans and specifications, or certifying that the permit has been unused; provided, however, that the Director may increase or reduce security based on current estimates or site conditions. Upon issuance of this certificate, any unused portion of any cash or certified check shall be returned to the applicant, and the applicant and his/her surety shall be released from all further obligations under this section (provided default has not occurred). The certificate of completion shall be issued within sixty-days from the date the Department receives written notice of completion, provided that during the sixty-day period, the Department inspects the work performed and is satisfied that the permittee has complied with the provisions of this section.

17.08.110 – Permit Denial.

- A. No permit authorizing grading shall be issued by the Director if it is found that the work proposed by the applicant is likely to endanger any property or public way, to pollute any water, or to damage wetlands or marine habitat. Factors to be considered by the Director include, but are not limited to, possible saturation by rains, earth movement, surface water runoff, soil erosion, sedimentation, siltation and subsurface conditions such as the stratification and faulting of rock, and the nature and type of soil and rock.

- B. Failure of the Director or his or her designee to observe or recognize hazardous conditions or failure to deny the grading permit shall not relieve the owner or the owner's agent from responsibility for the conditions or damages resulting from the failures, and shall not result in the City or its officers or agents being responsible for the damages resulting from the failures.
- C. No permits shall be issued to any applicant who has outstanding permit or code violations on other projects and activities within the City until those violations have been resolved satisfactorily as determined by the Director or his or her designee.

17.08.120 – Permit Suspension or revocation.

The director may suspend or revoke any grading or building permits after providing written notification to the permittee based on any of the following reasons:

- A. Any violation(s) of the terms or conditions of the approved erosion and sediment control plan or permits;
- B. Noncompliance with violation notice(s) or stop work order(s);
- C. Changes in site characteristics upon which plan approval and permit issuance were based; or
- D. Any violation(s) of this chapter or any rules and regulations adopted under it.
- E. Any violation(s) of the procedures set forth in the standards and specifications.

17.08.130 – Plan modification.

- A. The Anne Arundel Soil Conservation District may revise approved plans as necessary. Modifications may be requested by the owner/developer or department in accordance with the Anne Arundel Soil Conservation District's "major/minor change list for approved sediment and erosion control plans." The director may make minor changes to approved sediment and erosion control plans as listed on the Anne Arundel Soil Conservation District resolution titled, "Major/Minor Change List for Approved Sediment and Erosion Control Plans." Major changes must be approved by the Anne Arundel Soil Conservation District.

17.08.140 – Expiration, renewal, deadline extension and nontransferability.

- A. The applicant has thirty calendar days after the Department's verbal or written notification of permit approval to claim the approved grading permit for issuance, otherwise the permit will be considered void.
- B. A grading permit expires if no work is commenced within ninety days after issuance. A one-time renewal is permitted within a period of six months after the date of expiration if the conditions under which the permit was issued originally have remained unchanged, except that the construction phase time schedule must be revised. An application for permit renewal shall be made at least two months prior to the permit expiration date, and must be renewed by the Department and Anne Arundel Soil Conservation District. A permit may not be renewed more than once.
- C. A grading permit and the approved erosion and sediment control plan shall be valid for two years from the date of issuance, unless a shorter time period is designated by the Director or designee.
- D. If the applicant is unable to complete the work within the time specified in the approved application, the applicant shall present a written request for extension to the Director or designee within thirty days before the expiration of the permit. The extension request shall set forth the reasons for the extension. Where, in the sole discretion of the Director or designee, the extension is warranted, the Director may allow additional time as may be necessary to complete the approved work.
- E. No permit issued under this title is transferable without the concurrence of the Director or designee. A

written request for the transfer shall be submitted by the original applicant and the transferee shall acknowledge acceptance of the conditions under which the original permit was issued.

17.08.150 – Floodplain.

Grading within the nontidal one hundred-year floodplain within open drainage ways shall not be permitted, except at the discretion of the Director and only after approval by the appropriate State and Federal agencies. Grading within the tidal one hundred-year floodplain shall comply with all provisions of this chapter and Chapter 17.11, Floodplain Management.

17.08.160 – Erosion and sediment control-General requirements.

A. Effective control of soil to prevent erosion shall include the following:

1. Development shall be fitted to the topography and soils to create the least erosion potential.
2. Natural vegetation shall be retained wherever possible.
3. The smallest practical area of land shall be exposed at any one period during development for the shortest practical period of time in order to reduce the amount of land area and the duration of soil exposure.
4. Temporary vegetation or mulching shall be used to protect soils exposed during the time of development.
5. Erosion-control practices consistent with Standards and Specifications shall be installed to minimize soil and water losses.
6. During and after development, provisions shall be made to accommodate in an effective manner the increased water runoff caused by changes in soil and surface conditions and to avoid siltation of receiving streams.
7. Satisfactory cover shall be maintained during the life of the project and is subject to inspection.
8. Roads and streets shall be placed as close to the pre-existing contour as possible in order to minimize cutting or filling.
9. All graded surfaces, erosion-control measures, vegetative covers and other protective measures disturbed or destroyed during the course of operations shall be repaired, restored and maintained promptly in accordance with the approved plans and specifications until permanent measures are accepted by the Department.
10. The owner must provide contact information for a person(s) whom is responsible for the maintenance of the sediment and erosion control measures, whom is available twenty-four hours a day and seven days a week, and whom can respond immediately to resolve any emergency or necessary field correction. If said person(s) is unreachable via the submitted contact information during an emergency, or unable to perform required corrective actions, the owner and/or contractor may be issued a citation.

B. The Department shall investigate complaints or accept complaints from any interested party and apply their enforcement procedure when violations are confirmed. Any erosion and sediment control complaint received shall be acted upon, routinely with three working days, and the complainant shall be notified of any action or proposed action routinely within seven working days after receipt of the complaint.

17.08.180 – Prohibited discharges and prohibited use of coal tar pavement products.

A. No debris, sediment, wastewater, landscaping/yard waste, refuse, or other pollutant shall be deposited in floodplains, water resources, public streets, highways, sidewalks, storm drains, or other public

thoroughfares per this chapter of the City Code, Maryland Environment Title 4 as may be amended from time to time, COMAR 26.08.04, unless otherwise permitted by the City of Annapolis or the Maryland Department of the Environment. Such materials shall be stored properly to minimize any threat of discharge.

~~B. the following applies to all public and private uses of coal tar:~~

- ~~1. A person may not sell, offer for sale, use, or permit the use of a coal tar pavement product in the City. A property owner who knowingly permits the application of a product containing coal tar pavement product on their property shall be in violation of this Section and may be cited, in addition to the applicator of the product, pursuant to subsection (B)(3).~~
- ~~2. The Director shall publish, update as needed, and maintain on its website, a list of alternative products for use on asphalt and concrete that do not contain a coal tar pavement product.~~
- ~~3. Violators of this Section shall be required to remediate the surface of the coal tar pavement product. A violation of this Section shall be a municipal infraction and subject to a fine as established by resolution of the City Council. Each day that a violation occurs shall be considered a separate offense. The penalties set forth in this Section are in addition to any other remedies and penalties provided under federal, state, county, or local law.~~

~~17.08.200 – State and Federal standards for erosion and sediment control.~~

The Standards and Specifications established by the Maryland Department of the Environment and any other standards and procedures established by the Anne Arundel Soil Conservation District supplement this chapter and establish minimum standards for the control of soil erosion and sediment. Failure to comply with these standards is considered a violation of this chapter and may lead to revocation of a grading permit in accordance with Section 17.08.110 of the City Code.

~~17.08.210 – Drainage.~~

- ~~A. Surface water runoff shall be disposed of or conveyed in accordance with the provisions of this section.~~
- ~~B. Drainage facilities shall be designed to prevent erosion, uncontrolled overflow, and ponding when ponding is not an integral part of the design and function of the drainage facility. The water shall be conveyed to an acceptable outlet in accordance with the design criteria, standards and procedures required by the Department. The ponding of water is not permitted above a cut or fill slope. Adequate drainage facilities shall be provided to prevent ponding above a cut or fill slope.~~
- ~~C. Surface water or groundwater may not damage the face of a cut or fill. Each slope shall be protected from surface water runoff by a berm or swale. Suitable underdrains shall be installed to intercept and carry ground water seepage to an acceptable outlet.~~
- ~~D. Each area shall be graded to provide for positive drainage away from the building and toward the approved disposal area.~~
- ~~E. The construction of all structures shall be preceded by the installation of storm drainage systems and stabilization measures.~~
- ~~F. Stormwater management designs shall comply with Chapter 17.10, Stormwater Management, and Chapter 17.11, Floodplain Management.~~

~~17.08.220 – Inspections.~~

- ~~A. The permittee shall be responsible for maintaining a copy of the approved erosion and sediment control plans, and other approved site plans on site.~~

- B. The Director or designee may make additional inspections as he or she determines to be appropriate. No work approved in accordance with this chapter shall proceed beyond any one stage until the Director inspects the site and approves the work previously completed. Upon notification from the permittee the inspector shall inspect the site and notify the permittee of approval or rejection within forty-eight hours (exclusive of Saturdays, Sundays and legal holidays). If the inspector does not make an inspection within the specified time period, work may proceed. However, it will be without presumption of approval and at the sole risk of the permittee.
- C. Every active site having an approved erosion and sediment control plan should be inspected for compliance with the plan on the average of once every two weeks.
- D. A written report shall be prepared by the Department after every inspection. The report shall describe:
 - 1. The date and location of the site inspection;
 - 2. Whether the approved plan has been properly implemented and maintained;

- E. The Director shall notify the on-site personnel, and the owner/developer in writing, when violations are observed, describing:
 - 1. The nature of the violation;
 - 2. The required corrective action; and
 - 3. The time period in which to have the violation corrected.
- F. Department inspection notification is the responsibility of the permittee prior to the installation of any public improvements or stormwater management facilities.
- G. It is a condition of each grading permit that the City, its authorized agents have the right of entry to the site in order to inspect periodically for compliance with the approved plan and this title.
- H. In the event of a valid complaint concerning erosion and sediment control, an investigative inspection shall be made by the Department within three days of the complaint. A response to the complaint shall be made within seven days of the complaint.

 - 1. Cleared areas and benched or keyed surfaces prepared to receive fills; and
 - 2. Removal of unsuitable materials; and
 - 3. Construction of erosion control or drainage devices, buttress fills, underdrains, retaining walls, and other grading appurtenances; and
 - 4. The degree of compaction where tests are performed.
- B. All certified inspection reports and certified test results shall be submitted periodically to the Director during the performance of the work.

17.08.240—Existing hazards.

Whenever the Director or his or her designee determines that any existing grade, excavation, embankment or fill endangers or adversely affects the safety, use or stability of any public or private property, or water resource, the owner of the property upon which the condition exists, or other person or agent in control of the property, upon receipt of notice in writing from the Director or his or her designee, within the period specified in the notice, shall repair or eliminate the conditions in order to eradicate the hazard.

17.08.250—Appeals.

- A. A person aggrieved by an order from the Director or the Director's designee made pursuant to this chapter, other than the issuance of a municipal citation or the charging of a misdemeanor, may appeal to the Building Board of Appeals within fifteen calendar days of the date of the order. The petition for appeal shall be in writing stating the grounds for appeal and shall be filed with the Department of Planning and Zoning along with a nonrefundable fee in an amount established by the City Council. Any right to appeal shall be waived if not timely filed.
- B. The Building Board of Appeals shall consider the appeal based upon the information provided to the Department of Planning and Zoning at the time of the order from which the appeal is taking. If the Board finds that the order was in error or contrary to the provisions of this code or other applicable law, the Board may reverse or modify the order. The decision of the Board on all appeals shall be in writing and shall contain the factual findings of the Board and the reasons for the decision.
- C. A person aggrieved by a decision of the Building Board of Appeals made pursuant to this section may appeal that decision to the circuit court for Anne Arundel County pursuant to Maryland Rule Title 7, Chapter 200 or its successor. For purposes of this subsection, a person shall not be considered aggrieved by a decision of the Board unless the person has appeared as a party at the hearing before the Board. An appeal under this section shall be taken within thirty days of the date of the decision appealed and shall be the exclusive remedy of the aggrieved party from that decision.

17.08.260—Enforcement and noncompliance.

- A. Whenever a violation of this title is found on any site, whether or not a permit has been issued, the Department, or its authorized agent, shall notify the on-site personnel and the permittee of the violation, and describe the required corrective action and the time period in which to have the violation corrected.
- B. If the violation persists after the date specified by the Department for corrective action, then the Department shall issue a stop work order to on-site personnel and place a stop work order on the property.
- C. Within seven calendar days after the stop work order is issued or placed on site as described in this section, a copy of the order shall be sent by certified mail to the permittee and the owner. The Department shall determine the extent to which work is stopped, which may include all work on the site except that work necessary to correct a violation.
- D. If, in the judgment of the Department, remedial action has not taken place within the required time specified in the certified notification described in this section, the permittee and the owner shall be guilty of a municipal infraction and shall be subject to a fine as set by resolution of the city council. Each day after the deadline stated in the certified notification shall constitute a separate offense.
- E. The City shall pursue violations that affect secured work as follows:
 - 1. Whenever secured work does not comply with or conform to a permit or approved plans and specifications and if the City desires to obtain the security posted, a written notice of noncompliance shall be sent by certified mail to the permittee and the surety.

2. The notice shall set forth the nature of the corrections required and the time within which the corrections shall be made. If the permittee does not act on the notice within the time set forth, a stop-work notice shall be posted on the site and except as permitted by the Director, no further work is permitted on the site.
 3. If the corrections are not commenced and pursued in a diligent manner within the time specified in the notice, the permittee is considered to be in default of the obligations imposed by this title, and the City may take immediate action to obtain the security posted.
- F. The Department may seek an injunction against any person who violates or threatens to violate any provision of this chapter.
- G. In addition to any other sanction under this chapter, a person who fails to install or to maintain erosion and sediment controls in accordance with an approved erosion and sediment control plan is, under Section 4-116 of the Environment Article, Annotated Code of Maryland, guilty of a misdemeanor, and upon conviction in a court of competent jurisdiction is subject to a fine not exceeding ten thousand dollars or imprisonment not exceeding one year or both for each violation with costs imposed in the discretion of the court. Further, the City may bring a civil action against a person for a violation of this chapter, in an amount equal to double the cost of installing or maintaining the controls or of any restoration of damage caused to the environment.
- H. Any governing authority that recovers damages in accordance with this subsection shall deposit them in a special fund, to be used solely for:
1. Correcting, to the extent possible, the failure to implement or maintain erosion and sediment controls; and
 2. Administration of the sediment control program.
- I. Failure to obtain a permit as required in this chapter shall result in a stop work order until the appropriate permits have been approved. All work, except for the installation of erosion and sediment control measures necessary to contain and stabilize the site, shall cease in compliance with the stop work order.
- J. It shall be the responsibility of the owner, contractor or authorized agent to maintain erosion and sediment controls at all times during demolition, grading, construction and vacant land after hours, weekends and holidays.
- K. Any step in the enforcement process can be taken at any time, depending on the severity of the violation.
- L. A person who fails to comply with any or all of the requirements or provisions of this chapter or any order or requirement of the Director or any other authorized employee of the City is guilty of a municipal infraction and is subject to a fine as established by resolution of the City Council for each repeat or continuing violation. Each day after the expiration of the allowed remedial work period shall constitute a separate offense. In addition, no other inspections shall be made by the Department for the project in question until remedial action has been satisfactorily completed and the subject fine has been paid in full.

17.08.270—Emergencies.

- A. Whenever, in the judgment of the Director or his or her designee, an emergency exists which requires immediate action to protect the public health, safety, property or general welfare, an order may be issued without notice, conference or hearing, directing the owner, occupant, operator or agent to take that action appropriate or necessary to correct or abate the emergency. If circumstances warrant, the Director or his or her designee may act to correct or abate the emergency.
- B. The owner, occupant, operator or agent shall be granted a conference on the matter upon his or her request

as soon as practicable, but the conference shall not stay the abatement or correction of the emergency.

17.08.280—Records and as-built drawings.

Upon completion of work for which a grading permit was issued, the Department shall require the following:

- A. ~~As-built drawings;~~
- B. Certification by the owner or the permittee, or, upon request by the Director, by a registered professional, on the as-built drawings that grading, drainage structures, utilities, roadways, systems and erosion and sediment control practices, including facilities and vegetative measures, have been completed in conformance with the approved plans and specifications; and
- C. Upon request of the Director or his or her designee, a report summarizing the inspection reports, field and laboratory tests, and locations of test and field observations.
- D. ~~Surety will not be released until the as-built drawings have been reviewed and approved by the City.~~

17.08.290—Severability.

If any portion, section, subsection, sentence, clause or phrase of this title is held invalid or unconstitutional for any reason by any court of competent jurisdiction, that portion shall be considered to be a separate, distinct and independent provision and the holding shall not affect the validity of the remaining portion of this title, it being the intent of the City that this title shall stand, notwithstanding the invalidity of any portion, section, subsection, sentence, clause or phrase.

17.08.295—Grading, erosion, sediment control.

Unless noted otherwise, any person who violates any section of this chapter shall be guilty of a municipal infraction and is subject to a fine as established by resolution of the City Council. All fines must be paid in full prior to any continuation of work or prior to any further inspections. If a person or entity is found to have violated this section at one or more discrete sites within the City two or more times in any two-year period, such violation shall constitute a repeat violation.

Chapter 17.09—TREES IN DEVELOPMENT AREAS

17.09.010—Findings.

- A. Trees in the landscape provide a productive land use with significant water quality and wildlife habitat benefits. Trees also diminish air pollution, reduce noise, moderate temperature extremes, and increase property values, but can be affected adversely by indiscriminate development.
- B. Inadequate attention during development to the ecologic function of trees can result in measurable environmental and economic damage to property.
- C. The City of Annapolis is committed to the coordination of controlled development with certain environmental objectives, in compliance with the Chesapeake Bay critical areas program as required by Annotated Code of Maryland, Natural Resources Article, Title 8, Subtitle 18, (or its successors), and as stated throughout the City Charter and City Code. The presence of trees in the landscape helps to achieve these goals.

17.09.020—Purpose.

The purpose of this chapter is to protect and promote the public health, safety, property and general welfare by establishing standards of practice for the preservation of trees and the environmental design of landscapes in development areas in order to better control soil erosion and the transport of sediment, improve the environmental quality of surface and groundwaters, screen noise, and preserve, protect and enhance wildlife

habitat. This chapter establishes guidelines that will permit development while minimizing impact to existing woodland communities and encourages reforestation with species native to the area.

17.09.025 – Applicability.

- A. The requirements of this chapter shall apply for any application for a building and grading permit, or any application for a development project requiring site design plan review in accordance with the requirements of Chapter 21.22.
- B. Chapter 21.71 of the City Code shall apply to any public or private subdivision plan, or application for a grading permit, or any application for a development project requiring site design review, or any application for a special exception on areas forty thousand square feet or greater, except as provided in Annotated Code of Maryland, Natural Resources Article, Section 5-1602(b) (or its successors). Where any provision of the Forest Conservation Act and a provision of the City Code both apply, the more restrictive requirements may be employed.

17.09.030 – Landscape plan.

- A. Landscape Plan. Any application for a building or grading permit submitted in accordance with the requirements of this title, or any application for a development project requiring site design plan review in accordance with the requirements of Chapter 21.22 include a landscape plan at a scale of one inch to forty feet. The landscape plan shall be considered a part of the permit or site plan design review application and shall be subject to the review requirements and administrative procedures of this title or Chapter 21.22, whichever shall apply.
- B. Submittal Requirements. A landscape plan submitted in accordance with this chapter shall include:
 - 1. Limits of Disturbance (LOD). Within the limits of disturbance and within fifteen feet of the LOD, the location, diameter at breast height (DBH), and species of all existing trees equal to or greater than five inches DBH. If the size of the parcel and the number of affected trees renders the individual identification of all trees unreasonable, as mutually determined by the applicant and the Department of Planning and Zoning, accepted methods of forest cruising may be substituted, although all individual trees in excess of twelve inches DBH must be individually identified;

17.09.070 – Replacement value Mitigation Fee in lieu Exceptions.

- A. Replacement Trees. It is the intent of this section to ensure that landscaping proposed in association with development will reflect the density and species of those trees necessarily removed for development. Therefore, trees removed for development shall be replaced according to the following requirements:
 - 1. The number of trees to be replaced are contained in the following table:

Table 17.09.070

2. One or more trees may be transplanted as replacement trees from areas designated to be cleared on a development site; however transplanted trees shall only be used when a professional nursery, landscape contractor, or similar professional qualified to do this work, is employed to transplant the trees. This professional shall meet with City staff prior to moving any trees to ensure that the trees to be moved are healthy and suitable for transplanting.
 3. Replacement trees shall be a species native to Maryland and shall be healthy, free of pests or disease and in good condition. Deciduous species shall be a minimum of two inches in caliper measured six inches from the ground. Coniferous trees shall be a minimum of five feet in height. Transplanted trees shall be, at a minimum, of the approximate size as nursery stock and shall be healthy, free of pests or disease and in good condition.
 4. Any landscaping requirements imposed under other sections of this code shall include any and all replacement trees.
 5. Any waiver or modification to these requirements shall be made in accordance with Section 17.09.130 of this chapter.
- B. Mitigation. If the number of trees to be planted, as determined by the tree replacement requirements, exceeds the number of trees which can be accommodated practically on site as determined by the Department of Planning and Zoning, off-site planting may be requested at locations as determined by the developer and the Department of Planning and Zoning, or a fee in lieu of off-site planting may be required as provided in subsection C of this section. Trees removed for development within the critical area must be replaced within the critical area.
- C. Fee-in-Lieu. Where, pursuant to subsection A of this section, replacement on site is not practical and an off-

site location cannot be determined and agreed upon by the developer and the Department of Planning and Zoning, a fee-in-lieu as set by resolution of the City Council may be assessed which is adequate to ensure an equivalent tree replacement as required by subsection A of this section. All funds collected by this process will be expended exclusively for tree planting and tree maintenance within the City under the auspices of the urban forestry program and, wherever possible, within reasonable proximity to the development from which fees are collected for planting. Fees in-lieu collected for trees removed within the critical area shall be expended exclusively for tree planting and tree maintenance within the critical area, and if possible within the same creek watershed.

1. All funds collected by this process will be expended exclusively for tree planting and tree maintenance within the City under the auspices of the urban forestry program and, wherever possible, within reasonable proximity to the development from which fees are collected for planting.
 2. Fees in lieu collected for trees removed within the critical area shall be expended exclusively for tree planting and tree maintenance within the critical area, and if possible within the same creek watershed.
- D. Exceptions. The following trees removed for development are not subject to the requirements of Subsections A, B and C of this section:
1. Trees removed for the construction of approved roads and the installation or maintenance of public utilities.
 - a. Approved roads include City required public roads and fire lanes, but does not include any portion of a parking lot.
 - b. Public utilities include gas, electric, water and sewer main transmission lines, and stormwater management structures within required easements.
 2. Trees which have been confirmed by the Department of Planning and Zoning to be hazardous, dead, dying or diseased;
 3. Trees transplanted from one part of a development site to another.
- E. General Applicability. Except as provided by Subsection D of this section, the requirements of this section apply to all development and construction undertaken pursuant to any grading permit or pursuant to any building permit for construction which may involve the disturbance of land but for which a grading permit previously was not required.
- F. Minimum Standards. Afforestation and reforestation as required by the Maryland Forest Conservation Act, Annotated Code of Maryland, Natural Resources Article, Title 5, Subtitle 16 (or its successors) shall be a minimum standard for the replacement and planting of trees where Chapter 17.09 of this code applies, regardless of the square footage of the area disturbed.
- G. The locations of intensely developed areas, limited development areas, resource conservation areas and the critical area buffer are shown on the approved critical areas map for the City of Annapolis and its amendments. Proposed development shall be consistent with the approved critical areas plan for the City of Annapolis.
- H. Additional Standards for Limited Development Areas.
1. Under normal circumstances, no more than twenty percent of any forest or woodland may be removed from forest use, except as permitted in Subsection (C)(3) of this section. The remaining eighty percent shall be maintained through recorded, restrictive covenants or similar instruments.
 2. A developer may clear or develop up to thirty percent of any forest or woodland, provided that the afforested area shall be one and one-half times the total surface acreage of the disturbed forest or developed woodland. The remaining seventy percent shall be maintained through recorded, restrictive covenants or other similar instruments.
 3. If no forest is established on proposed development sites, these sites shall be planted to provide a forest or developed woodland cover of at least fifteen percent of the total surface area of the site.
 4. Forests which have been cleared before obtaining a grading permit, or that exceed the maximum area allowed in Subsection (C)(3) of this section shall be planted at three times the areal extent of the cleared forest.

5. The developer shall consider the recommendations of the Maryland Forest, Parks and Wildlife Service when planning development on forested lands.
- ~~I. Additional Standards for Resource Conservation Areas.~~
1. In addition to the requirements of Subsection H of this section, the overall acreage of forest and woodland within the resource conservation area may not be decreased.
 2. Any development within a resource conservation area that requires the cutting or clearing of trees must replace the trees on a not less than an equal area basis, except where trees are removed according to Subparagraphs 4, 6 and 8 of Subsection J of this section.
- ~~J. Additional Standards for the Critical Area Buffer.~~
1. A one hundred-foot buffer is established landward from the mean high water line of tidal waters, tributary streams, and tidal wetlands which is a protected area.
 2. New development activities, including structures, roads, parking areas and other impervious surfaces, mining or related facilities, or septic systems, may not be permitted in the buffer, except for those necessarily associated with water-dependent facilities.
 3. The buffer shall be maintained in natural vegetation, but may include planted vegetation as approved by the Department of Planning and Zoning where necessary to protect, stabilize or enhance the shoreline.
 4. Cutting of trees or removal of natural vegetation may be permitted where necessary to provide access to private piers, or to install and construct a shore erosion protection device or measure, or a water-dependent facility, provided the device, measure or facility has received all necessary City, State, and Federal permits.
 5. With the concurrence of the Department of Planning and Zoning, individual trees may be cut for personal use providing that this cutting does not impair the water quality or existing habitat value or other functions of the buffer, and provided that the trees are replaced on an equal area basis for each tree cut.
 6. With the concurrence of the Department of Planning and Zoning, individual trees may be removed which are in danger of falling and causing damage to dwellings or other structures, or which are in danger of falling and therefore causing the blockage of streams, or resulting in accelerated shore erosion.
 7. Horticultural practices shall be used to maintain the health of individual trees.
 8. Other cutting techniques may be permitted within the one hundred-foot buffer and under the advice and guidance of the Department of Planning and Zoning, if necessary to preserve the forest from extensive pest or disease infestation or threat from fire.
- ~~K. Forest Preservation Plan.~~ The forest preservation plan as described within the approved critical areas program for the City of Annapolis shall be consistent with the provisions of this chapter.
- ~~L. Forest Undeveloped Wood Land.~~ Where forests or developed woodland occur within the City of Annapolis, local policies and programs for tree cultural operations in the critical area shall be consistent with the critical area program of the City of Annapolis.
- ~~M. Applicability.~~ The requirements of this section are in addition to, and not in lieu of, any and all requisites of this chapter.

- ~~O. Variance Procedures.~~ Variance procedures shall be in accordance with the approved critical areas plan of the City of Annapolis.
- ~~P. Minimum Standards.~~ The provisions of the Maryland Forest Conservation Act, Annotated Code of Maryland, Natural Resources Article, Title 5, Subtitle 16, (or its successors) do not apply to the critical area, except that afforestation and reforestation as required by the Act shall be a minimum standard for the replacement and planting of trees.

17.09.080 – Critical area.

17.09.090 – Natural and landscaped buffers.

- A. Guidelines for the Design of Areas Designated as Natural or Landscaped Buffers. The criteria set forth in this section shall be taken into consideration in the design of all buffer areas shown on the landscaping plan required by Section 17.09.030, including all buffers included to satisfy the requirements of Section 21.62.030 of this code.
1. The primary purpose of the buffer shall be defined on the landscaping plan and the natural or landscaped buffer shall reflect that definition. The purpose of a buffer may include, but not be limited to, urban streetscape beautification, enhancement of building architecture, visual shielding, noise reduction, wildlife habitat enhancement, and water quality management.
 2. A defined buffer shall comply with the standards for tree preservation as defined in Section 17.09.030 (B).
 3. Within the critical area, the buffer shall be consistent with the requisites for habitat protection areas in the critical area (Section 17.09.080(E) of this chapter).
 4. The buffer shall have vertical stratification, i.e., canopy layer, understory and shrub layer, as needed to reflect the stated purpose of the buffer.
 5. The buffer shall have continuous plantings and/or existing vegetation within the designated buffer area, as needed to reflect the stated purpose of the buffer.
 6. The buffer shall be designed in full cognizance of any utility plans, stormwater management plans, sedimentation and erosion control plans, and grading plans. Wherever architecturally or engineeringly possible, interference with designated buffer areas is to be avoided.
 7. Plantings within the buffer area shall not impair access to utilities for their maintenance and repair.
 8. Plantings may not be within or atop any stormwater management structures, but shall be placed to complement their function, if possible.
 9. Where a designated buffer area adjoins other landscaped or natural areas, the developer shall blend the proposed buffer with existing adjacent conditions, with particular attention to the necessity to provide wildlife corridors.
 10. Any landscaping of the designated buffer area shall occur after the placement of sidewalks, roads, driveways, utilities and stormwater management structures which may affect the buffer, and after final grade has been established.
 11. Trees required to be replaced on-site according to Section 17.09.070(A) and (B) shall be placed, as a first priority, within designated buffer areas if additional planting in the buffer is stipulated.
 12. Any changes made in the field to a designated buffer area must first be approved by the Department of Planning and Zoning.
 13. Natural and landscaped buffers within the critical area shall be subject to the requisites of Sections 17.09.080 in addition to the requisites of this section. If there are any inconsistencies between these sections, the more restrictive shall apply.

17.09.100 – Landscape standards.

- A. All designated buffer areas, as well as all other on-site natural or landscaped areas, shall be consistent with Chapter 14.12, and Sections 20.24.160 and 21.62.120 where applicable. If there are any inconsistencies between these sections, the more restrictive shall prevail.
- B. The developer/owner is responsible for the purchase, planting, care and maintenance of all trees planted in accordance with this chapter, except for the care and maintenance of trees planted off-site pursuant to Section 17.09.070(B). Additionally, the developer/owner is not responsible for the care and maintenance of trees and shrubs planted for a single-family or two-family attached or detached home after sale of the home by the builder or developer to the initial consumer. All trees of nursery stock installed according to the requisites of this chapter must be listed on the State and/or City recommended tree list and shall meet American Association of Nurserymen standards for nursery stock.
- C. The Department of Planning and Zoning may require that the installation of all improvements as noted on the approved landscape plan be bonded, including those trees designated for preservation, and excluding

those trees transplanted from one location on site to another, and excepting those trees to be planted off-site pursuant to Section 17.09.070(B). On the satisfactory completion of the improvements as noted on the approved landscape plan, the security described in this section shall be released; provided, however, that a one year maintenance bond or other appropriate security be substituted in an amount to be determined by the Director, which amount shall be not more than ten percent of the cost of installation of the improvements. The amount of this bond or other security shall be reduced to reflect the portion attributable to those trees on a lot with a single-family or two-family attached or detached home after the sale of that home by the developer or building to the initial consumer. Any waiver or modification to these requirements shall be made in accordance with Section 17.09.130 of this chapter.

17.09.110 – Easements.

In the case of new development, easements may be sought for use as buffer or landscaped areas and are subject to the intent of this chapter. These easements shall be indicated on the plat of record and granted to all property owners within the development area, and shall require property owners to maintain the buffer and/or landscaped area in accordance with the approved landscape plan.

17.09.120 – Landscaping plans Approvals Inspections.

A. Plans. In accordance with Section 17.09.030 of this chapter, landscaping plans shall be submitted for review to the Department of Planning and Zoning.

B. Approvals.

1. No cutting, clearing, digging or grading may be undertaken until a landscape plan has been approved. No landscaping may be undertaken until the approval of the landscape plan.
2. Where development is proposed within the critical area, all plans must be consistent with the approved critical area program for the City of Annapolis.
3. Plan approvals or disapprovals shall be made in writing by the City of Annapolis Department of Planning and Zoning to the applicant.

C. Inspections.

1. Work which may affect tree areas designated for preservation may not proceed to the next phase of construction until the Department of Planning and Zoning approves tree protection measures pursuant to Sections 17.09.040, 17.09.050 and 17.09.060.
2. Areas designated as buffers shall be inspected by the Department of Planning and Zoning for agreement with the approved buffer site plan. Occupancy and/or use permit approvals shall be contingent upon the favorable inspection of buffer areas.
3. The project site shall be inspected by the Department of Planning and Zoning for agreement with the approved landscape plan. Occupancy and/or use permit approvals shall be contingent upon the favorable inspection of the project site.
4. Any bonds required by the City of Annapolis for landscaping will be reduced upon the final inspections by the Department of Planning and Zoning, or at that time that the landscape requirements are met by the developer/applicant.

17.09.130 – Waiver or modification.

A. The Director of Planning and Zoning, may waive or modify the minimum requirements set forth in this chapter if it can be demonstrated by the applicant that:

1. Special practices may be undertaken which will meet the intent of this chapter but not the minimum requirements as strictly interpreted; or
2. Special circumstances exist which prevent the applicant from meeting the minimum requirements as strictly interpreted.

B. The Director of Planning and Zoning may not waive or modify, under the provisions of this section, any existing City or State requirements.

C. Any applicant aggrieved by refusal to grant a waiver or modification of any of the requirements of this chapter by the Director of Planning and Zoning may appeal the decision to the Building Board of Appeals within fifteen working days of the decision.

17.09.140 – Enforcement Violation Penalties.

- A. Enforcement. The administration and enforcement of this chapter shall be the responsibility of the Department of Planning and Zoning.
- B. Violation. Violation of this chapter may be cause for the developer to be required to stop work until a satisfactory resolution is established by the Department of Planning and Zoning and the developer.
- C. Penalties. Any developer who violates this chapter is guilty of a municipal infraction and is subject to a fine as established by resolution of the City Council. The unapproved removal of a single tree constitutes a single violation and each day a violation continues without abatement or mitigation will be considered a separate violation with fines as established by resolution of the City Council. If any trees shown to be preserved on the approved plan subsequently are removed or are dead or dying because of acts of negligence by a developer, this shall be considered a violation and fines shall be assessed. The trees shall be replaced by the developer, or the developer shall be assessed a fee in lieu. The size, species and quantity of replacement trees or fee in lieu shall be specified by the Department of Planning and Zoning and shall be consistent with Section 17.09.070(C). If necessary, off-site locations identified by the Department may be utilized if there are constraints on the site. Replacement shall be within a time frame specified by the Department of Planning and Zoning.
- D. Replacement Trees. In addition to any other penalty or requirement that may be imposed under this section, if any trees shown to be preserved on the approved plan subsequently are removed or are dead or dying because of acts of negligence by a developer, they shall be replaced by the developer. The size, species and quantity of replacement trees shall be specified by the Department of Planning and Zoning based upon Section 17.09.070(C). The quantity shall be dictated by the constraints of the site. Replacement shall be within a time frame specified by the Department of Planning and Zoning.
- E. Appeals. The Building Board of Appeals shall consider appeals from the provisions of this chapter from the determination of the Director of Planning and Zoning in the manner specified in the Building Code. The Board may make determinations of alternative methods, standards or materials when, in its opinion, strict compliance with this chapter is unnecessary. The provisions of this subsection shall not apply to any municipal citation issued pursuant to section.

17.10.080 – Stormwater management criteria.

A. The minimum control requirements established in this section and the Design Manual are as follows:

- 1. The Department of Public Works requires that the planning techniques, nonstructural practices, and design methods specified in the Design Manual are to be used to implement ESD to the MEP. The use of ESD planning techniques and treatment practices must be exhausted before any structural BMP is implemented. Stormwater management plans for development projects subject to this Ordinance shall be designed using ESD sizing criteria, recharge volume, water quality volume, and channel protection storage volume criteria according to the Design Manual. The MEP standard is met when channel stability is maintained, predevelopment groundwater recharge is replicated, nonpoint source pollution is minimized, and structural stormwater management practices are used only if determined to be absolutely necessary.
- 2. Control of the two and ten-year frequency storm event shall be required according to the design manual if the Department of Public Works determines that historical flooding problems exist and impact existing downstream floodplain development.
- 3. The Director of the Department of Public Works may require more than the minimum control requirements specified in this section if hydrologic or topographic conditions warrant or if flooding, stream channel erosion, or water quality problems exist downstream from a proposed project.
- 4. Alternative minimum control requirements may be adopted subject to Administration approval. The Administration shall require a demonstration that alternative requirements will implement ESD to the MEP and control flood damages, accelerated stream erosion, water quality, and sedimentation. Comprehensive watershed studies may also be required.
- 5. Stormwater management and development plans where applicable, shall be consistent with adopted and approved watershed management plans or flood management plans as approved by the Maryland Department of the Environment in accordance with the Flood Hazard Management Act of 1976.

B. In the case of redevelopment, every stormwater management plan shall satisfy the following requirements:

- 1. The stormwater management plan shall be consistent with the Design Manual.
- 2. The stormwater management plan shall reduce existing site impervious areas by at least fifty percent.

Where site conditions prevent the reduction of impervious area by fifty percent, the stormwater management plan shall provide qualitative control for at least fifty percent of the site's existing impervious area. When a combination of impervious area reduction and stormwater practice implementation is used, the combined area shall equal or exceed fifty percent of the site's impervious area. Any permit application legally submitted prior to April 9, 2007, shall meet the requirements of the unamended regulation.

3. Upon application by the owner or his or her agent, the Director of Public Works may waive the requirements of the preceding paragraph if hydrologic and hydraulic design conditions prevent impervious area reduction or on-site stormwater management. Waivers shall be consistent with Section 17.10.120 of this Code. In granting such a waiver, the Director shall direct the applicant to the following practical alternatives:
 - a. Off-site BMP implementation for a drainage area at least one and one-half times the size and percent imperviousness to that of the project;
 - b. Watershed or stream restoration;
 - c. Retrofitting; and/or
 - d. Other practices to reduce impervious surfaces or the impact of stormwater runoff not inconsistent with the purposes of this chapter.
4. The Department of Public Works may develop separate policies for providing water quality treatment for redevelopment projects. Any separate redevelopment policy shall be reviewed and approved by the Administration and may include, but not be limited to:
 - a. A combination of ESD and an on-site or off-site structural BMP;
 - b. Retrofitting including existing BMP upgrades, filtering practices, and off-site ESD implementation;
 - c. Participation in a stream restoration project;
 - d. Pollution trading with another entity;
 - e. Payment of a fee-in-lieu; or
 - f. A partial waiver of the treatment requirements if ESD is not practicable.
5. The determination of what alternatives will be available may be made by the Department of Public Works at the appropriate point in the development review process. The Department shall consider the prioritization of alternatives in Section 17.10.08[0].B.4. of this Code after it has been determined that it is not practicable to meet the 2009 regulatory requirements using ESD. In deciding what alternatives may be required, the Department may consider factors including, but not limited to:
 - a. Whether the project is in an area targeted for development incentives such as a Priority Funding Area, a designated Transit Oriented Development area, or a designated Base Realignment and Closure Revitalization and Incentive Zone;
 - b. Whether the project is necessary to accommodate growth consistent with comprehensive plans; or
 - c. Whether bonding and financing have already been secured based on an approved development plan.

A separate written waiver request shall be required in accordance with the provisions of this section if there are subsequent additions, extensions, or modifications to a development receiving a waiver.
- B. Except as provided in Section 17.10.120D of this code, if watershed management plans consistent with Section 17.10.075F of this code have not been developed, stormwater management quantitative control waivers may be granted to the following projects provided that it has been demonstrated that ESD has been implemented to the MEP:
1. That have direct discharges to tidally influenced receiving waters;
 2. That are in-fill development located in a Priority Funding Area where the economic feasibility of the project is tied to the planned density, and where implementation of the 2009 regulatory requirements would result in a loss of the planned development density provided that:
 - a. Public water and sewer and stormwater conveyance exist;
 - b. The quantitative waiver is applied to the project for the impervious cover that previously existed on the site only;
 - c. ESD to the MEP is used to meet the full water quality treatment requirements for the entire development; and ESD to the MEP is used to provide full quantity control for all new impervious surfaces; or

- D. Stormwater management quantitative and qualitative control waivers may be granted for phased development projects if a system designed to meet the 2009 regulatory requirements and the Department of Public Works requirements for multiple phases has been constructed by May 4, 2010. If the 2009 regulatory requirements cannot be met for future phases constructed after May 4, 2010, all reasonable efforts to incorporate ESD in future phases must be demonstrated.

The amount of the contribution shall not exceed the cost of constructing an effective on-site stormwater management facility, including the value of the land that would be required to construct the stormwater management facility, as well as the cost of constructing, landscaping and perpetually maintaining the facility. The cost of perpetually maintaining the stormwater management facility is presumed to equal to the cost of constructing the stormwater management facility.

(B) Where field surveyed topography or digital topography indicates that ground elevations are below the closest applicable base flood elevation, even in areas not delineated as a special flood hazard on the FIRM, the area shall be considered as special flood hazard area.

(C) To establish base flood elevations in special flood hazard areas that do not have such elevations shown on the FIRM, the Floodplain Administrator may provide the best available data for base flood elevations, may require the applicant to obtain available information from Federal, State or other sources, or may require the applicant to establish special flood hazard areas and base flood elevations as set forth in Section 17.11.320, Section 17.11.330, and Section 17.11.340 of this chapter.

- (3) The susceptibility of the proposed development and its contents (if applicable) to flood damage and the effect of such damage on the individual owner.
- (4) The importance of the services to the community provided by the proposed development.
- (5) The availability of alternative locations for the proposed use which are not subject to, or are subject to less, flooding or erosion damage.
- (6) The necessity to the facility of a waterfront location, where applicable, or if the facility is a functionally dependent use.
- (7) The compatibility of the proposed use with existing and anticipated development.
- (8) The relationship of the proposed use to the comprehensive plan and hazard mitigation plan for that area.
- (9) The safety of access to the property in times of flood for passenger vehicles and emergency vehicles.
- (10) The expected heights, velocity, duration, rate of rise, and sediment transport of the floodwaters and the effects of wave action, if applicable, expected at the site.

(B) A determination that failure to grant the variance would result in exceptional hardship due to the physical characteristics of the property. Increased cost or inconvenience of meeting the requirements of this chapter does not constitute an exceptional hardship to the applicant.

(C) A determination that the granting of a variance for development within any designated floodway, or flood hazard area with base flood elevations but no designated floodway, will not result in increased flood heights beyond that which is allowed in this chapter.

(D) A determination that the granting of a variance will not result in additional threats to public safety; extraordinary public expense, nuisances, fraud or victimization of the public, or conflict with existing local laws.

(E) A determination that the building, structure or other development is protected by methods to minimize flood damages.

(F) A determination that the variance is the minimum necessary to afford relief, considering the flood hazard.

ALL NUISANCE TREES AND SHRUBS TO BE REMOVED OR TO BE WORKED UPON MAY BE MARKED APPROPRIATELY BY THE DEPARTMENT.

19.10.170 - COST OF PLANTING, REMOVING, MAINTAINING AND PROTECTING.

A. THE COST OF PLANTING TREES ON PUBLIC RIGHTS-OF-WAY SHALL BE FINANCED JOINTLY BY THE ADJACENT PROPERTY OWNER AND THE CITY. WHEN A STREET TREE IS REQUESTED BY AN ADJACENT PROPERTY OWNER, THAT ADJACENT PROPERTY OWNER SHALL PAY TO THE CITY THE SUM OF THIRTY DOLLARS PER TREE. THE CITY SHALL ASSUME THE REMAINING COSTS FOR THE PURCHASE AND PLANTING OF THE TREE.

B. A SPECIAL ANNUAL ASSESSMENT ON PROPERTY OWNERS NOT TO EXCEED FIVE CENTS PER LINEAR FOOT OF STREET FRONTAGE MAY BE IMPOSED BY THE CITY COUNCIL. THE FUNDS GENERATED BY THE IMPOSITION OF THE ASSESSMENT SHALL BE USED ONLY FOR THE PLANTING, MAINTENANCE AND REMOVAL OF TREES AND SHRUBS IN PUBLIC AREAS.

19.10.180 - INTERFERENCE WITH DEPARTMENT.

NO PERSON SHALL PREVENT, DELAY, OR INTERFERE WITH THE DEPARTMENT IN THE EXECUTION OR ENFORCEMENT OF THE PROVISIONS OF THIS CHAPTER.

19.10.190 - NUISANCE-DESIGNATED.

ANY TREE OR SHRUB OR PART OF A TREE OR SHRUB GROWING UPON PRIVATE OR PUBLIC PROPERTY WHICH IS INTERFERING WITH THE USE OF ANY PUBLIC AREA, INFESTED WITH AN INFECTIOUS PLANT DISEASE, INFESTED WITH INJURIOUS INSECTS, INJURIOUS TO PUBLIC IMPROVEMENTS, OR ENDANGERING THE LIFE, HEALTH OR SAFETY OF PERSONS OR PROPERTY IS A PUBLIC NUISANCE.

19.10.200 - NUISANCE-ABATEMENT.

A. IF THE DEPARTMENT DETERMINES, UPON INSPECTION OR EXAMINATION, THAT ANY NUISANCE TREE OR SHRUB EXISTS IN OR UPON ANY PUBLIC AREA, THE DEPARTMENT IMMEDIATELY SHALL CAUSE THE TREE OR SHRUB TO BE TREATED, TRIMMED, REMOVED OR OTHERWISE ABATED TO ELIMINATE OR PREVENT THE SPREAD OF THE NUISANCE. THE MANNER IN WHICH THE NUISANCE IS ABATED SHALL BE DETERMINED BY THE DEPARTMENT.

B. IF THE DEPARTMENT DETERMINES, UPON INSPECTION OR EXAMINATION, THAT ANY NUISANCE TREE OR SHRUB EXISTS IN OR UPON ANY PRIVATE PROPERTY, THE OWNER OR TENANT HAVING CHARGE OF THE PREMISES SHALL BE GIVEN WRITTEN NOTICE DESCRIBING THE NUISANCE TREE OR SHRUB AND THE NECESSARY CORRECTIVE ACTION. WITHIN THIRTY DAYS AFTER THE ISSUANCE OF THE NOTICE, THE PERSON SHALL UNDERTAKE THE CORRECTIVE ACTION SPECIFIED IN THE NOTICE UNLESS, IN THE OPINION OF THE DEPARTMENT, AN EMERGENCY EXISTS, IN WHICH CASE THE

DEPARTMENT IMMEDIATELY SHALL CAUSE THE TREE OR SHRUB TO BE TREATED, TRIMMED, REMOVED OR OTHERWISE ABATED TO PREVENT THE SPREAD OF THE NUISANCE. IF THE OWNER OR TENANT REFUSES OR NEGLECTS TO COMPLY WITH THE TERMS OF THE WRITTEN NOTICE WITHIN THIRTY DAYS AFTER RECEIVING IT, THE DEPARTMENT SHALL ABATE THE NUISANCE AND THE EXPENSE OF ABATEMENT SHALL BE A CHARGE AND LIEN UPON THE REAL PROPERTY ON WHICH THE TREE OR SHRUB IS LOCATED, TO BE COLLECTED IN THE SAME MANNER, AND BEAR THE SAME INTEREST AND PRIORITY AS REAL PROPERTY TAXES.

19.10.210 - APPEALS.

A PERSON AGGRIEVED BY AN ORDER FROM THE DEPARTMENT MAY APPEAL TO THE BUILDING BOARD OF APPEALS WITHIN FIFTEEN CALENDAR DAYS OF RECEIPT OF THE ORDER, PER SECTION 17.12.130. CHAPTER 19.20 - TREES IN DEVELOPMENT AREAS

19.20.010 - FINDINGS.

A. TREES IN THE LANDSCAPE PROVIDE A PRODUCTIVE LAND USE WITH SIGNIFICANT WATER QUALITY AND WILDLIFE HABITAT BENEFITS. TREES ALSO DIMINISH AIR POLLUTION, REDUCE NOISE, MODERATE TEMPERATURE EXTREMES, AND INCREASE PROPERTY VALUES, BUT CAN BE AFFECTED ADVERSELY BY INDISCRIMINATE DEVELOPMENT.

B. INADEQUATE ATTENTION DURING DEVELOPMENT TO THE ECOLOGIC FUNCTION OF TREES CAN RESULT IN MEASURABLE ENVIRONMENTAL AND ECONOMIC DAMAGE TO PROPERTY.

C. THE CITY OF ANNAPOLIS IS COMMITTED TO THE COORDINATION OF CONTROLLED DEVELOPMENT WITH CERTAIN ENVIRONMENTAL OBJECTIVES, IN COMPLIANCE WITH THE CHESAPEAKE BAY CRITICAL AREAS PROGRAM AS REQUIRED BY ANNOTATED CODE OF MARYLAND, NATURAL RESOURCES ARTICLE, TITLE 8, SUBTITLE 18, (OR ITS SUCCESSORS), AND AS STATED THROUGHOUT THE CITY CHARTER AND CITY CODE. THE PRESENCE OF TREES IN THE LANDSCAPE HELPS TO ACHIEVE THESE GOALS.

19.20.020 - PURPOSE.

THE PURPOSE OF THIS CHAPTER IS TO PROTECT AND PROMOTE THE PUBLIC HEALTH, SAFETY, PROPERTY AND GENERAL WELFARE BY ESTABLISHING STANDARDS OF PRACTICE FOR THE PRESERVATION OF TREES AND THE ENVIRONMENTAL DESIGN OF LANDSCAPES IN DEVELOPMENT AREAS IN ORDER TO BETTER CONTROL SOIL EROSION AND THE TRANSPORT OF SEDIMENT, IMPROVE THE ENVIRONMENTAL QUALITY OF SURFACE AND GROUNDWATERS, SCREEN NOISE, AND PRESERVE, PROTECT AND ENHANCE WILDLIFE HABITAT. THIS CHAPTER ESTABLISHES GUIDELINES THAT WILL PERMIT DEVELOPMENT WHILE MINIMIZING IMPACT TO EXISTING WOODLAND COMMUNITIES AND ENCOURAGES REFORESTATION WITH SPECIES NATIVE TO THE AREA.

19.20.025 - APPLICABILITY.

A. THE REQUIREMENTS OF THIS CHAPTER SHALL APPLY FOR ANY APPLICATION FOR A BUILDING AND GRADING PERMIT, OR ANY APPLICATION FOR A DEVELOPMENT PROJECT REQUIRING SITE DESIGN PLAN REVIEW IN ACCORDANCE WITH THE REQUIREMENTS OF CHAPTER 21.22.

B. CHAPTER 19.30 OF THE CITY CODE SHALL APPLY TO ANY PUBLIC OR PRIVATE SUBDIVISION PLAN, OR APPLICATION FOR A GRADING PERMIT, OR ANY APPLICATION FOR A DEVELOPMENT PROJECT REQUIRING SITE DESIGN REVIEW, OR ANY APPLICATION FOR A SPECIAL EXCEPTION ON AREAS FORTY THOUSAND SQUARE FEET OR GREATER, EXCEPT AS PROVIDED IN ANNOTATED CODE OF MARYLAND, NATURAL RESOURCES ARTICLE, SECTION 5-1602(B) (OR ITS SUCCESSORS). WHERE ANY PROVISION OF THE FOREST CONSERVATION ACT AND A PROVISION OF THE CITY CODE BOTH APPLY, THE MORE RESTRICTIVE REQUIREMENTS MAY BE EMPLOYED.

- F. Subdivision Access.
 - 1. New public streets developed as part of a subdivision and necessary to provide legal access to subdivision lots will be considered as contributing to the impervious surface requirements of this chapter. The Planning and Zoning Director and the Director of Public Works may, however, allow subdivision redesign in order to minimize the amount of subdivision land dedicated to streets.

B. Notice Requirements.

Posting of Property. Upon initial application for a forest conservation act review, the following posting must be done:

1. Notice must be posted on the property that is the subject of an application no less than five business days following an application for forest stand delineation review.
2. Failure to post within five business days may result in the applicant's application being determined to be invalid by the department and a new application will need to be submitted before the project will be reviewed.
3. It is the responsibility of an applicant to post any notice required under this section on the property that is the subject of an application, unless the applicant is not the property owner, in which case it is the responsibility of the property owner.
4. The posted notice must be obtained from the Department and include language indicating that the property is under Forest Conservation Act review and where interested parties may find information about the application and a copy of the plans under review.

There is a rebuttable presumption that priority retention areas shall be retained. The presumption can only be rebutted under the criteria specified in Section 21.71.080.B. of this Act.~~
- 5. ~~If existing forest on the site subject to a forest conservation plan cannot be retained, the applicant shall demonstrate to the satisfaction of the Department:~~
 - i. ~~How techniques for forest retention have been exhausted;~~

- ~~b. Where on the site in priority areas afforestation or reforestation will occur in compliance with Natural Resources Article, § 5-1607, Annotated Code of Maryland; and~~
- ~~iii. How the disturbance to the priority forests and priority areas specified in Natural Resources Article, § 5-1607(c)(2), Annotated Code of Maryland, qualifies for a variance.~~
6. The applicant shall demonstrate to the satisfaction of the Department that the requirements for afforestation or reforestation onsite or offsite cannot be reasonably accomplished if the applicant proposes to make a payment into the forest conservation fund or to purchase credits from a forest mitigation bank.
7. Nontidal Wetlands: A regulated activity within the net tract area that occurs wholly or partly in areas regulated as nontidal wetlands under Environment Article, Title 9, Annotated Code of Maryland, is subject to both the nontidal wetlands regulatory requirements and the requirements of this chapter, subject to the following:

For the purpose of calculating reforestation mitigation under this section, a forested nontidal wetland permitted to be cut or cleared and required to be mitigated under Environment Article, Title 9, Annotated Code of Maryland, shall be shown on the forest conservation plan and subtracted on an acre-for-acre basis from the total amount of forest to be cut or cleared as part of a regulated activity;
 - iii. Nontidal wetlands shall be considered to be priority areas for retention and replacement;
 - iv. Forested nontidal wetland identification and delineation should be included at the earliest stage of planning to assist the applicant in avoidance and reduction of impacts to the nontidal wetlands and to avoid delay in the approval process.
8. An approved forest conservation plan is valid for five years.

The general public may participate in the discussion of the application. The meeting shall be recorded and the recording shall be retained until such time as the appellate period tolls and made publicly available. In the event there are significant modifications to the preliminary forest conservation plan, the Department may require an additional public meeting if it determines such a meeting would serve the public interest.
- 6. During different stages of the review process, the preliminary forest conservation plan may be modified, provided the department approves of the changes. All significant modifications must be posted for public review and comment.

~~21.71.080 – Afforestation and retention.~~

A. ~~Afforestation Requirement.~~ A person submitting an application after the effective date of this chapter for subdivision or project plan approval, a grading permit, or a sediment control permit for an area of land of forty thousand square feet or greater, shall:

- ~~1. Conduct afforestation on the lot or parcel in accordance with the following:~~
 - ~~i. A tract having less than twenty percent of the net tract area in forest cover shall be afforested up to at least twenty percent of the net tract area for the following land use categories:~~
 - ~~a. Agriculture and resource areas, and~~
 - ~~b. Medium density residential areas;~~
 - ~~ii. A tract with less than twenty percent of its net tract area in forest cover shall be afforested up to at least twenty percent of the net tract area for the following land use categories:~~
 - ~~a. Institutional development areas,~~
 - ~~b. High density residential areas,~~
 - ~~c. Mixed use and planned unit development areas, and~~
 - ~~d. Commercial and industrial use areas;~~
- 2. Comply with the following when cutting into forest cover that is currently below the afforestation percentages described in Subsection A.1. of this section:
 - i. The required afforestation level shall be determined by the amount of forest existing before cutting or clearing begins; and
 - ii. Forest cut or cleared below the required afforestation level shall be reforested or afforested at a two to one ratio and added to the amount of afforestation necessary to reach the minimum required afforestation level, as determined by the amount of forest existing before cutting or clearing began.

~~B. Retention.~~

- 1. The following trees, shrubs, plants, and specific areas are considered priority for retention and protection and shall be left in an undisturbed condition unless the applicant has demonstrated, to the

satisfaction of the Department, that reasonable efforts have been made to protect them and the plan cannot reasonably be altered:

- i. Trees, shrubs, and plants located in sensitive areas including the 100-year floodplain, intermittent and perennial streams and their buffers, coastal bays and their buffers, steep slopes and their buffers, nontidal wetlands, and critical habitats.
 - ii. Contiguous forest that connects the largest undeveloped or most vegetated tracts of land within and adjacent to the site.
2. The following trees, shrubs, plants, and specific areas are considered priority for retention and protection and shall be left in an undisturbed condition unless the applicant has demonstrated, to the satisfaction of the Department, that the applicant qualifies for a variance in accordance with Section 21.71.170 of this chapter:
- i. Trees, shrubs, or plants determined to be rare, threatened, or endangered under:
 - a. The Federal Endangered Species Act of 1973 in 16 U.S.C. §§ 1531-1544 and in 50 C.F.R. 17,
 - b. The Maryland Nongame and Endangered Species Conservation Act, Natural Resources Article, §§ 10-2a-01-10-2a-09, Annotated Code of Maryland, and

 - b. Are associated with a structure designated as historic by the Maryland Historic Trust, the National Park Service, or the City of Annapolis; or
 - c. Have been designated by the State, County, or the Department as a National, State, County or Municipality champion tree; and
 - iii. Any tree:
 - a. Having a DBH of thirty inches or more, or
 - b. Which has been designated as a significant tree pursuant to this chapter.

21.71.090 – Reforestation.

A. Forest Conservation Threshold.

1. There is a forest conservation threshold established for all land use categories, as provided in Subsection A.2. of this section. The forest conservation threshold means the percentage of the net tract area at which the reforestation requirement changes from a ratio of one acre planted for each acre removed above the threshold to a ratio of two acres planted for each acre removed below the threshold.
2. After reasonable efforts to minimize the cutting or clearing of trees and other woody plants have been exhausted in the development of a subdivision or project plan, grading and sediment control activities, and implementation of the forest conservation plan, the forest conservation plan shall provide for reforestation, purchase of credits from a forest mitigation bank, or payment into the forest conservation fund, according to the formula set forth below and in Subsection A.3. of this section and consistent with Section 21.71.070.A. of this chapter, and the following forest conservation thresholds for the applicable land use category:

Category of Use	Threshold Percentage
(1) Agricultural and Resource Areas	50 percent
(2) Medium Density Residential Areas	25 percent
(3) Institutional Development Areas	20 percent
(4) High Density Residential Areas	20 percent
(5) Mixed Use and Planned Unit Development Areas	20 percent
(6) Commercial and Industrial Use Areas	20 percent

3. Calculations.

- i. For all existing forest cover measured to the nearest one-tenth acre cleared on the net tract area above the applicable forest conservation threshold, the area of the forest removed shall be reforested at a ratio of one acre planted for each acre removed.
- ii. For all existing forest cover measured to the nearest one-tenth acre cleared on the net tract area below the applicable forest conservation threshold, the area of forest removed shall be reforested at a ratio of two acres planted for each acre removed below the threshold.

21.71.100 – Priorities and time requirements for afforestation and reforestation.

A. Sequence for Afforestation and Reforestation.

- 1. After techniques for retaining existing forest on the site have been exhausted, the preferred sequence for afforestation and reforestation, as determined by the Department, is as follows:
 - i. Forest creation in accordance with a forest conservation plan using one or more of the following:
 - a. Transplanted or nursery stock,
 - b. Whip or seedling stock, or
 - c. Natural regeneration where it can be adequately shown to meet the objective of the Forest Conservation Technical Manual;
 - ii. In a municipal corporation with a tree management plan and in an existing population center designated in a county master plan that has been adopted to conform with the Economic Growth, Resource Protection, and Planning Act of 1992, or in any other designated area approved by the Department, the use of:
 - a. Street trees as a permissible step in the priority sequence for afforestation or reforestation and with a mature canopy coverage may be granted full credit as a mitigation technique, and
 - b. Acquisition of an offsite protection easement on existing forested areas within the City boundaries not currently protected in perpetuity as a mitigation technique, in which case the afforestation or reforestation credit granted may not exceed fifty percent of the area of forest cover protected;
 - iii. When all other options, both onsite and offsite, have been exhausted, landscaping as a mitigation technique conducted under an approved landscaping plan that establishes a forest at least thirty-five feet wide and covering at least two thousand five hundred square feet of area.
- 2. A sequence other than the one described in Subsection A.1. of this article may be used for a specific project, if necessary, to achieve the objectives of the City Land Use Plan or City Land Use

~~Policies, or to take advantage of opportunities to consolidate forest conservation efforts.~~

~~3. The following are considered a priority for afforestation and reforestation:~~

- ~~i. Those techniques that enhance existing forest by selective clearing or supplemental planting onsite;~~
