17.28.095

SECTION I: BE IT ESTABLISHED AND ORDAINED BY THE ANNAPOLIS CITY COUNCIL that the Code of the City of Annapolis shall be amended to read as follows:

**Title 17 - BUILDINGS AND CONSTRUCTION
Chapter 17.28 - PLUMBING CODE**

Section 17.28.090 - Permit-Fees-Schedule.

The charges for issuance of permits are the sum of a connection charge, a capital facility charge, a capital facility assessment charge and an installation charge. The charges shall be recommended to the City Council by the Director of Public Works and collected by the Director of Planning and Zoning. The schedule of fees shall be established by resolution of the City Council.

- A. **Connection Charges.** Connection charges for a one inch or less water service and four-inch sewer service shall be based on the City's cost of constructing the water and sewer service lines between the property line and main pipeline, including the cost of the water meter. There will be no connection charges for water services constructed by the applicant (all services greater than one inch and, when approved by the Director of Public Works, one inch or less) and for sewer services constructed by the applicant (all service greater than four inches and, when approved by the Director of Public Works, four inches), but all costs associated with the construction of the connection between the property line and main pipeline, including the cost of the water meter, shall be the responsibility of the applicant.
- B. **Capital Facility Charges.** Capital facility charges shall be based on equivalent dwelling units (EDU). An EDU is ~~two hundred fifty~~ 250 gallons per day. No less than one EDU shall be charged.
1. An individual residential dwelling unit is one EDU.
 2. All other uses will be charged based on the number of EDUs. Determination of the number of EDUs is as follows:
 - (a) By Director of Planning and Zoning. Whenever a charge is set based on EDUs, the property owner shall provide all information required by the Director of Planning and Zoning and the Director shall reasonably determine, based on that information and any other information that the Director deems appropriate, the number of EDUs for a property based on peak daily usage. If the Director of Public Works determines within a three-year period after the initial determination that the property owner provided materially inaccurate information, the Director shall re-determine the number of EDUs and the property owner shall be liable for the difference in any charge that is set based on EDUs.
 - (b) By agreement.
 - (1) In this section, "peaked average daily usage" means a number of gallons of water that is the product of the average daily water usage by a property owner during the highest actual usage billing cycle within a defined period times the peaking factor of 1.4.
 - (2) If the Director of Public Works finds that new technology or other unique circumstances may significantly affect the determined peak daily usage, the Director may enter into an agreement with the property owner to recalculate the number of EDUs based on peaked average daily usage over a period of time determined by the Director. The agreement shall provide for refund of charges by the City if peaked average daily usage is less than ~~eighty~~ 80 percent of determined peak daily usage and for payment of additional charges by the property owner if peaked average daily usage is more than ~~one hundred twenty~~ 120 percent of determined peak daily usage based on the recalculation. The agreement shall include terms and conditions as determined by the Director to protect the City's interest in receiving payment of all additional charges and to bind as necessary the property owner and any successor in interest. If there is a change in use of the property during the time when the recalculation is being made, the agreement shall be null and void.

3. Industrial wastes of unusual strength or character may be assessed additional EDUs as determined by the Director of Planning and Zoning or his or her designee may require pretreatment to remove heavy metals or other deleterious materials prior to discharge of the waste to the City sewer system.
4. Combined commercial, industrial and institutional facilities' EDUs shall be determined by summing the EDUs for the individual functional areas.
5. A person who purchases a home in the urban renewal project area and who previously resided in the home either as an owner or renter continuously for six months immediately prior to the acquisition of the home by the urban renewal authority, is exempt from the payment of the capital facilities charge.
6. Capital facilities and capital facilities assessment charges shall be used exclusively to pay for either or both the capital improvements and retirement of bonds on the sewer systems and water systems or facilities and not to supplement user rates.
7. When the use and occupancy of a structure is changed, the Director of Planning and Zoning or his or her designee shall determine if the water consumption or sewage discharge has changed materially from the previous use. Any significant increase in usage or discharge may require assessment of capital facilities charges as outlined in this subsection.

C. Capital Facility Assessment Charge. A capital facility assessment charge will continue to be applied after December 19, 2011 for accounts with remaining capital facility assessment charge balances. For active permits prior to December 19, 2011, the current structure for capital facility assessment charges will continue to be in effect.
